

A woman with long brown hair and blue eyes is looking at a tablet computer. She is wearing a dark blue dress with a white pattern. The background is a dimly lit office at night, with large windows and blurred lights from the city outside. A pink circular graphic is overlaid on the right side of the image, containing the text.

**Broadcom Inc. enables
disaster recovery at
minimal costs with
Wipro's Disaster
Recovery as-a-Service
on Oracle Cloud**

Client background

Client name: Broadcom Inc.

Industry type: Semiconductors
(Technology)

Products or services or core business:
Semiconductors and infrastructure
software products

Geography or areas of operations:
Global

Challenges

Broadcom is growing fast with frequent M&As – the latest being the acquisition of Symantec. This has resulted in an ever increasing need for expansion of its IT environment. Simultaneously, Broadcom also wanted to avoid any further capital investments and was looking for alternatives to increase ROI on IT investments. Broadcom needed:

Agile IT solutions with a scalable operating model for seamless expansion

Reusability of existing underutilized hardware

Reduced Total Cost of Ownership (TCO)

Robust and reliable architecture

Wipro implemented Disaster Recovery as-a-Service on Oracle Public Cloud, transforming the organization's disaster recovery landscape from a CAPEX to OPEX model

Solution

Understanding Broadcom's ambition for growth, Wipro worked towards leveraging Oracle Cloud to offer them the agility and scalability they needed. As a first step towards Broadcom's Cloud journey, Wipro implemented and managed a new Disaster Recovery (DR) ecosystem as-a-Service, migrating the Enterprise Applications DR setup from on-premise to Oracle Public Cloud.

Databases provisioned on the high-performance Exadata Cloud Services

Applications landscape provisioned as Infrastructure as-a-Service (IaaS)

Migrated both Oracle and Non-Oracle workloads

Achieved Recovery Time Objective (RTO) and Recovery Point Objectives (RPO)

Business impact

This completely transformed Broadcom's DR landscape from a CAPEX to OPEX model, offering

the organization elasticity to expand on Cloud as and when required.

“Migrating the disaster recovery setup to Oracle Cloud has been our first step toward the Cloud. It has provided us with the agility and scalability required to support future growth at reduced cost. We are confident about Wipro's expertise to take the journey further – fulfilling our business and IT needs with Cloud.”

Padmanabhan Jumbunathan
Director, Enterprise Applications,
Broadcom Inc.
