

Wipro's Connected Devices solution

Wipro's Connected Devices solution is built on Software AG Digital Business Platform. It collects, analyzes and processes real-time machine data from IoT-enabled devices, thereby providing a smart ecosystem of interconnected devices.

The solution is part of Wipro's Digital Integration as-a-Service platform and leverages Software AG Digital Business Platform product stack.

Enables transformation of the production landscape into a smart and intelligent platform with connected systems and devices

Ability to process large amount of machine and system data efficiently and make intelligent decisions quickly

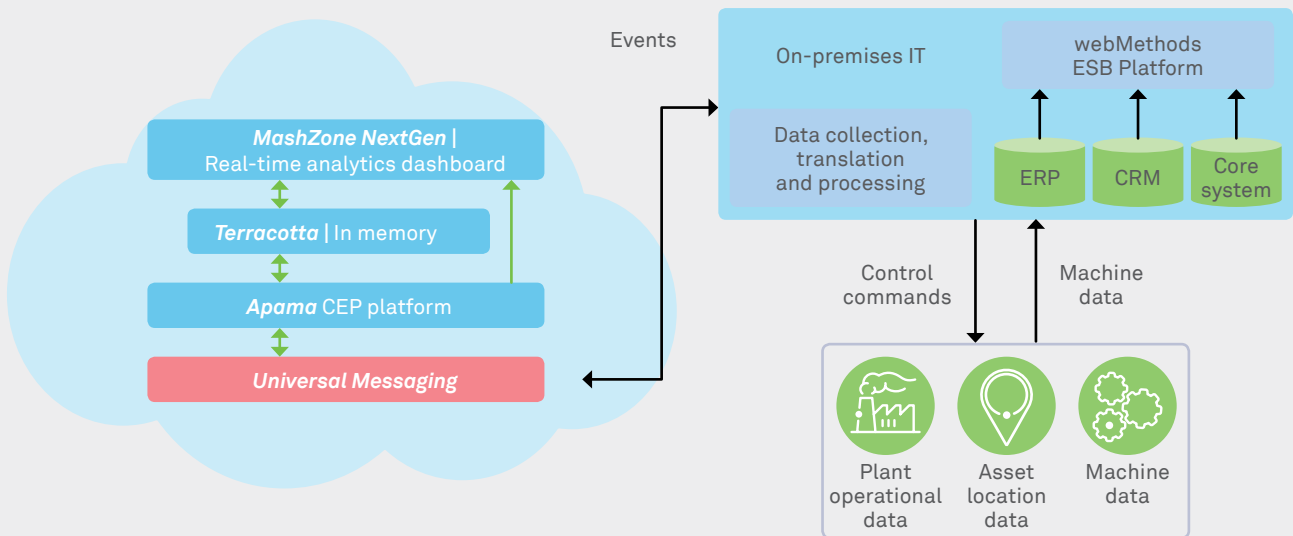

Builds predictive intelligence models by continuous monitoring of devices and systems

An intelligent platform for building a smart, IoT-based ecosystem

Preventive maintenance of systems and devices for a redefined consumer experience

Solution overview

Key features

- Preventive maintenance and quicker action towards anomalies
- Plant-wide visibility of devices and applications in one dashboard
- Predictive intelligence models over a period of time

Key benefits

- Smart fault management with minimal need for manual intervention
- Operational excellence and improved productivity
- Reduction in operational costs
