

Wipro's accelerator kit for Pega

Wipro brings proven methodologies, solution accelerators and assets, conceptualized and created based on our extensive experience in delivering BPMS/BRMS and automation solutions for customers in Pega technologies.

Adopt our Pega specific methodology for the New Digital way of execution

Pega AppStore

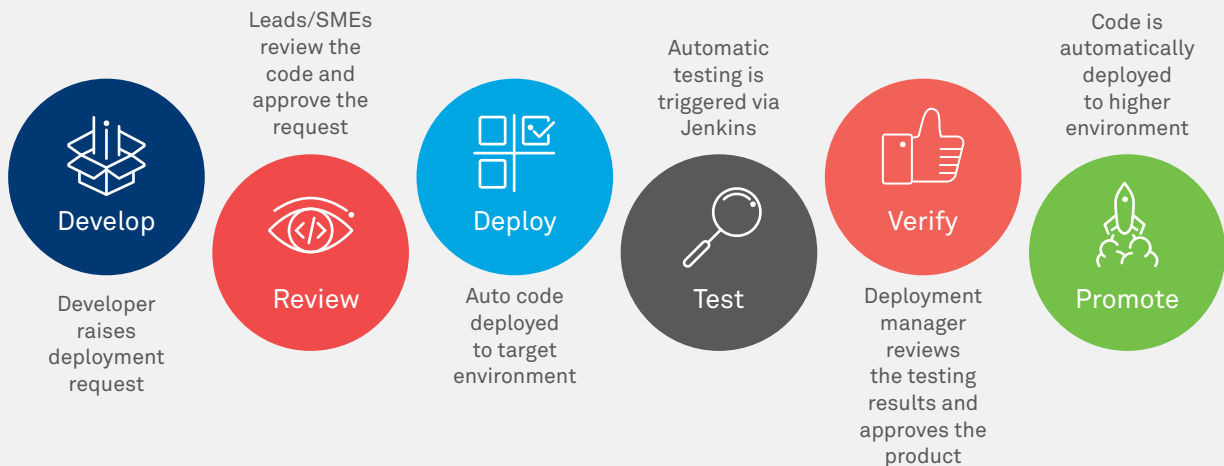

Development accelerator library that helps in rapid Pega implementation and high reusability.

- Design, construction, testing and deployment guides for consistency in your development process
- Pre-built components to add proven functionality while reducing development time

DevOps for Pega

Our DevOps solution for Pega enables us to automate the product zip creation, automated regression testing, central repository for results and product file storage, test result validation, tagging of requests to release cycle and automated deployment to target environment.

Jet fuel your business transformation with Wipro's contextual solution accelerators and assets

Code quality inspector

This solution controls the quality of the code of Pega applications developed in an organization.

Key benefits include:

- Establishes better governance and effective policies and procedures
- Promotes awareness and improves compliance to best practices
- Improves reusability and maintainability
- Enables faster and consistent reviews
- Reduces defect rates

Enterprise asset tracker

This component helps to promote governance of changes to components, used across the enterprise with the following features and benefits:

- Notifies all subscribed applications of any changes to such assets
- Eliminates manual analysis in change in asset rule
- Mandates the resolution process (for configured apps) through a review and approved flow
- Easy to configure and facilitate the resolution process
