

Simplified global systems footprint with streamlined business processes and data

Improved global inventory visibility and product traceability by consolidating 31 instances down to 5 core instances

INDUSTRY LANDSCAPE

Current trends in the industry indicate that large Pharmaceutical companies are looking to consolidate and standardize business processes, data and systems to reduce overall expenses and complexities of the systems, provide improved real time visibility and business information and significantly reduce compliance and technology obsolescence risk.

CLIENT BACKGROUND

A leading diversified healthcare giant assisting healthcare professionals and their patients with treatment of complex medical conditions for more than 75 years.

THE OPPORTUNITY

There were 31 Instances i.e. customized software of JDE with

- Obsolete hardware platform;
- Increased maintenance costs
- No process or data governance
- Extremely complex JD Edwards environment
- Lack of real time visibility and business information
- No Centralized repository of data with lack of content

Simplified global systems footprint by consolidating 31 Instances i.e. customized software of JDE down to 5 core instances

SOLUTION

- Provided Master Data Management solution and shared best practices across regions through development of global model
- Simplified global systems footprint by consolidating down to 5 core instances of JDE
- Standardized data definitions and transactional processes
- Implemented updated technology with high availability and disaster recovery
- Technologies used are
 - JDE 8.12
 - WebSphere
 - Hyperion
 - Pega

BUSINESS IMPACT

- Improved inventory visibility & control and tracking & traceability of product
- Improved "Where Used" capability of finished goods and raw materials
- Monitor and enforce global consistency of process and data through MDM
- Standardized patient management capabilities
- Cost Reduction through Global Delivery
- Better portfolio management
