Internal Fraud
Significantly underestimated with ad-hoc and reactive response

What gets reported is just the tip of the iceberg - a lot more lies below the surface and goes unnoticed!

20x
Cost of employee theft compared to external theft

5%
Revenues lost to occupational fraud

HALF
Collusion and SoD breakdowns ascribed to password sharing

88%
Fraud incidents suppressed by businesses

Challenges in proactive detection
Why do traditional approaches fail?

Scale
Inability to handle high volume & unstructured data

Skills
Limitations in legacy techniques

Speed
Delays in data handling & processing

Silos
Alerts & insights locked in business functions
