

WIPRO TRANSFORMX

Adding Agility, Transparency and Efficiency to Message Transmission

Challenges

Owing to the ever changing business models and regulations, Financial Institutions are increasingly getting interconnected. They have been leveraging aging 'message' integration channels with customers, partners and service providers as well as dealing with multiple types of integration and format requirements. This is leading to:

- Increasing spends on messaging infrastructure and services
- Greater need to monitor changing messaging standards such as SWIFT, FIX, FpML and proprietary formats
- Challenges in scalability and portability of messages thereby leading to the need for format conversion
- Increased checks and balances on message transmission

The Solution

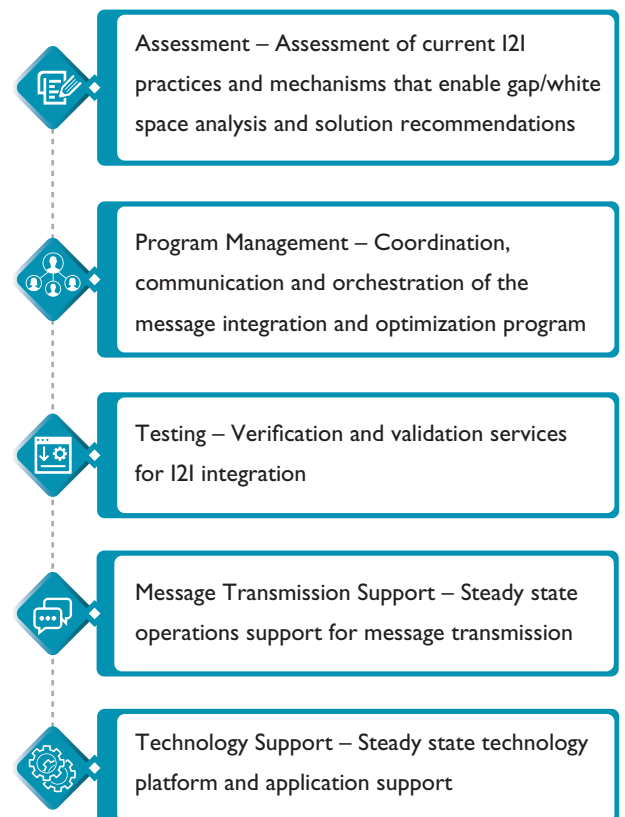

Wipro TransformX solution enables Financial Institutions to expand and enhance their core business by providing a fully-managed service for Institution-2-Institution (I2I) Integration. Wipro TransformX addresses the scalability, portability and cost related challenges of the integration requirements through a message transformation service by providing:

- A scalable, resilient and extensible messaging framework and process asset
- Accelerators for integration, portability and monitoring of messages
- An open platform for Straight Through Processing (STP) and improved transparency
- Commercial models aligned to the client's business model

Suite of Services

Wipro addresses the needs of financial institutions by offering a full suite of advisory, technology and operations services, which include:

Features

The Wipro TransformX Solution has point accelerators that include:

Ready-Adapters for SWIFT; FIX; FPML and CSV designed for multiple transport protocols, which allow accelerated time to market and reduced TCO for clients

A secure FTP that provides batch file transmission in a perfectly designed infrastructure

Benefits

The Wipro TransformX Scalable Service Delivery (SSD) Model allows clients to focus on customer demands with superior service delivery and customer experience, typically leading to:

40% reduction in cost from current attempts for messaging implementation

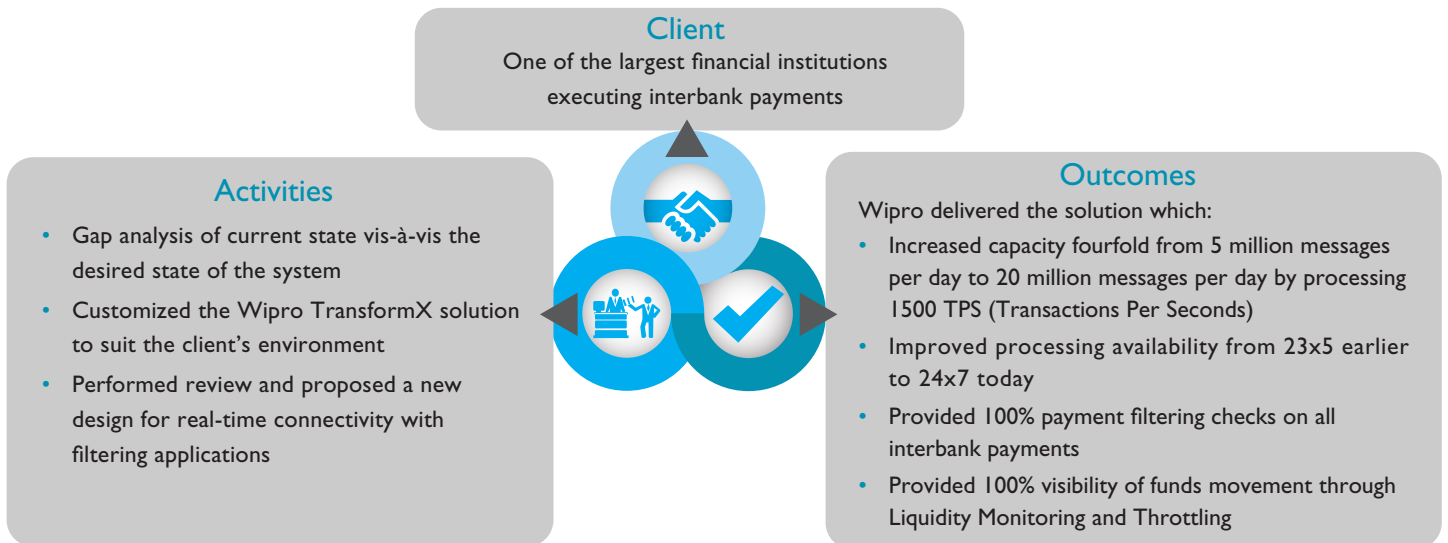

Increased STP by up to 25%, and a 70% improvement in time to revenue with quick setup and onboarding of "paying" clients

The Wipro TransformX App Framework allows firms the access to a scalable platform capable of processing large volumes and handling 10 million messages/day at 1,000 TPS
