Utilities know that effective asset and work management strategies are critical to ensure organizational efficiency, keep costs low, and provide a foundation for continuous improvement.

Wipro’s Excellence Roadmap Solution

Wipro’s Excellence Roadmap Solution helps you identify where you are today, in terms of your asset management maturity. Wipro’s experts will also help you understand where you want to go, and provide the support and expertise to get you there.

Benefits of Wipro’s Excellence Roadmap Solution

- Reduce operational costs by eliminating inefficiencies
- Increase plant asset reliability and availability
- Ensure that safety and compliance requirements are being met
- Improve customer satisfaction
- Improve reporting and operational processes

An initial assessment, conducted by Wipro’s experts, will cover:

- The connection between your organization’s strategic plan and how you care for your assets
- Your capability, structure and competence in asset management
- How you manage risk and how this affects day-to-day decision making
- How ‘whole life costs’ are monitored and controlled in your organization
- Where you enable asset management and where improvement can be made
- To what degree planning is optimized and how much benefit the organization is realizing from planning efforts
- How the correct mix and location of resources (e.g. tools, equipment, people) are determined
- Preparedness for emergencies or major events
Excellence in Asset Management
Making the most of physical assets and enabling world-class asset management capability

Many companies know that they need to improve their asset management processes but cannot set the right course to achieve the necessary improvements. In quite a number of instances, organizations are not certain about what improvements are actually necessary. They know that they are not getting the most out of their assets, but are not sure what to do first or what more could be gained by improving asset management. Further, the risk profiles of assets are indiscernible, and companies know that this situation must be corrected.

Wipro asset management practitioners help companies clear-up uncertainties around asset management and set the course for excellence. Asset management maturity is not just about installing a well-known Enterprise Asset Management (EAM) tool or a popular Computerized Maintenance Management System (CMMS). In addition to the right technology, the right processes must be in place and the right people must be doing the right things at the right time.

Wipro offers a range of assessment and support services related to standards like PAS 55 and ISO 55000. We work alongside asset management stakeholders to help the organization’s capability increase over an effective timeframe.

Winning Together
Wipro’s WINNING TOGETHER approach is all about driving Joint Go to Market initiatives with Strategic Alliances and helping customers Do Business Better.
