About Non-GAAP Financial Measures

This press release contains non-GAAP financial measures within the meaning of Regulation G and Item 10(e) of Regulation S-K. Such non-GAAP financial measures are measures of our historical or future performance, financial position or cash flows that are adjusted to exclude or include amounts that are excluded or included, as the case may be, from the most directly comparable financial measure calculated and presented in accordance with IFRS.

The table on page 9 provides IT Services Revenue on a constant currency basis, which is a non-GAAP financial measure that is calculated by translating IT Services Revenue from the current reporting period into U.S. dollars based on the currency conversion rate in effect for the prior reporting period. We refer to growth rates in constant currency so that business results may be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons of our business performance. Further, in the normal course of business, we may divest a portion of our business which may not be strategic. We refer to the growth rates in both reported and constant currency adjusting for such divestments in order to represent the comparable growth rates.

This non-GAAP financial measure is not based on any comprehensive set of accounting rules or principles and should not be considered a substitute for, or superior to, the most directly comparable financial measure calculated in accordance with IFRS and may be different from non-GAAP measures used by other companies. In addition to this non-GAAP measure, the financial statements prepared in accordance with IFRS and the reconciliation of these non-GAAP financial measures with the most directly comparable IFRS financial measure should be carefully evaluated.
