

Wipro FullStride Boundaryless Enterprise

Hybrid Cloud Solutions Delivered with VMware
and Google Cloud

As companies embark on their cloud journey, they often need to quickly exit data centers and reduce migration risks while ensuring operational consistency with on-premises environments. The Wipro FullStride Boundaryless Enterprise (BLE) solution accelerates the journey to cloud with reduced risks and lower TCO while helping enterprises meet sustainability targets. The solution builds on the Google Cloud VMware Engine (GCVE), a powerful joint offering from Google Cloud and VMware. Delivered through Global Cloud Studios, BLE provides future-ready cloud lifecycle services for GCVE. Wipro FullStride BLE incorporates workload-centric cloud assessments and R-Lane decisions to arrive at the right treatment for each application, landing zone designs for GCVE, automated migration planning and execution using VMware HCX, and machine-learning-driven managed services.

Key Features

Infrastructure as a Service leveraging GCVE

Operates natively on dedicated bare-metal Google Cloud infrastructure powered by the VMware Software-Defined Data Center (SDDC) platform.

Application modernization through Google Kubernetes Engine (GKE) & Google Cloud Native Services

Enables application modernization using GKE/Anthos on Google Cloud and leverages Google Cloud native services like BigQuery, GKE, Anthos, and Pub/Sub.

Accelerated transformation

Enabled through high-speed, low-latency interconnect between GCVE and native Virtual Private Cloud in Google Cloud.

Retained existing VMware investments

Provides flexible purchase options like VMware Cloud Universal, customers can use their VMware subscriptions across GCVE, private cloud, and Edge environments.

Wipro is a VMware Principal Partner and a Premier and Managed Service Provider partner for Google Cloud with expertise badges in infrastructure, data analytics, application modernization, and more.

Key Benefits

Accelerated data center exits

Enables accelerated migration to GCVE to achieve 2X faster data center exits, with compliant infrastructure and improved performance

Enhanced agility to meet business demand

Responds quickly to changing business needs, such as merger and acquisition activities, geographical expansion, improved developer productivity, faster releases, and seamless scaling of on-premises infrastructure

Super cloud economics

30% savings through industrialized migration with lowered risk

Reduces cost through DRaaS for enhanced disaster recovery coverage

Wipro received VMware's 2022 Partner Lifecycle Services award and Google Cloud's 2021 Specialization Partner of the Year for Application Development award.

Wipro FullStride Cloud Services Portfolio

Cloud Transformation Services:

Automated discovery, assessment, and migration of applications running on on-premises VMware vSphere environments to Google Cloud VMware Engine powered by Wipro FullStride Cloud Studios globally

App Modernization Services:

Building secure modern applications powered by the Tanzu portfolio or GCP cloud native services gives developers both autonomy and speed for faster application releases

Cloud Operations:

Seamless and automated operations powered by Wipro FullStride Cloud Services' Enterprise Digital Operations Center – machine-learning-driven managed services for infrastructure and applications across VMs and Kubernetes environments

Our technology accelerators and dedicated team of experienced domain and technology consultants collaboratively lead clients through their cloud transformation journey. With deep industry expertise and a robust partner ecosystem, Wipro FullStride Cloud Services helps customers stay ahead of the curve by improving business outcomes.
