Siemens-Wipro Partnership

Driving Innovation and
Excellence Together

February 2025

The Siemens-Wipro partnership is a strategic collaboration of over 25 years aimed at transforming various industries through innovative solutions. Leveraging the strengths of both companies, the alliance focuses on delivering cutting-edge solutions that drive digital transformation across design, manufacturing, and operations. This partnership exemplifies a successful combination of technological expertise and strategic vision, delivering innovative solutions and driving business value for clients.

How We Deliver Value:

Strategic Level Consulting & System Integration Partnership: Focused on product development, integrations and go-to-market initiatives aligned to Siemens Industry-Specific Digital Threads.

Seamless Integration of Siemens' Digital Thread with Wipro Industry DOT: Offers industry-specific use cases and solutions, along with seamless integration of AI-driven Digital Thread and Digital Twins

Our Approach at a Glance:

Account Level Partnership: Providing personalized attention to address specific client requirements and requests, ensuring tailored solutions such as Joint GTM from Legacy to Next-Gen PLM.

Access to Siemens Partner Portal: Sharing product and process knowledge, accessing product updates, and pre-released software. Contains the largest pool of Teamcenter X certified consultants.

Global Product Development & System Integration: Offering comprehensive CAD and xLM interoperable solutions tailored to streamline operations and enhance efficiency across global systems.

Industry Specific GTM: Jointly investing in the GTM approach as well as solution development for industry-specific Teamcenter solution.

Embrace the future of digital innovation with the Siemens-Wipro partnership. Partner with Siemens-Wipro to drive innovation and excellence in your industry. Contact us at rahul.bahl@wipro.com to explore how we can support your success.
