

Wipro's BoundaryLess Data Management powered by Rubrik takes away the complexity of protecting and managing your data

Wipro's BoundaryLess Data Management (BLDM) powered by Rubrik Security Cloud, keeps your data secure, monitors data risk and enables faster recoveries. Simplify and secure your data recoveries from cyberattacks, ransomware and malware with air-gapped, immutable access-controlled backups. Early detection of incidents leads to faster response. Rubrik Security Cloud brings the technology to monitor, observe and identify risks to data. The solution enables rapid and granular recovery of a variety of workloads while providing the necessary safeguards against a reinfection. Wipro's enterprise resiliency services assure of multi-cloud technology integration, service integration and deliver end to end managed services to enable business continuity. Wipro's BLDM solution provides a reliable data backup and recovery solution that protects against cyber threats. It strengthens the last line of defense to protect your backups and your enterprise.

Key takeaways

Wipro's BLDM solution simplifies data management and provides instant recovery by converging legacy infrastructure and software into a single software fabric. The joint solution offers a single unified view of enterprise data protection with global search and cloud-native capabilities that help organizations accelerate to the cloud. Cloud archival and cloud instantiation capabilities provide data mobility, allowing the use of the cloud to achieve on-demand disaster recovery, and for migration. In addition to this, below are the data security capabilities of this solution:

- Data Resilience – Safeguards your data and ensures that data is always available for recovery
- Data Observability – Monitors data risks continuously and remediates threats quickly
- Data Recovery – Quarantines malware and automates recovery to ensure business operations are restored quickly

Make your business unstoppable – Secure your data, wherever it lives, across enterprise, cloud, and SaaS.

Key benefits

Integrates data security into your data management platform and IT operations

Rapidly recovers and avoids ransom

Reduces the cybersecurity costs

Drives business efficiency

Increased business agility with multi-cloud agility

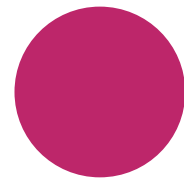

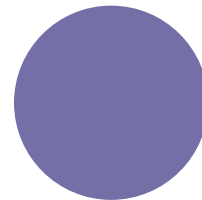

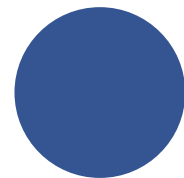

Enhanced control over cloud data and strengthened compliance

Rubrik security cloud provides a centralized state-of-the-art user interface to manage enterprise and multi-cloud backups, elevating your cyber resiliency posture against cyber threats.

Features

The Wipro Rubrik joint solution is a scale-out file system built on a distributed single software fabric for complete data management across the data center and cloud, which requires no forklift upgrades.
