Everest Group Banking Operations – Services PEAK Matrix® Assessment 2023

Focus on Wipro
July 2023
Introduction

The landscape for banking operations market has become relatively consolidated at the top, with the leading participants capturing a bigger share of the pie and with the entry of specialists in a few banking segments. Cards and payments and retail banking emerged as high-growth LoBs. Enterprises are focusing to become future-ready, agile, and resilient to manage volume fluctuations and staff shortages.

Providers are differentiating themselves by offering as-a-service models and focusing on digital transformation solutions by leveraging analytics, automation, and AI, combined with industry expertise and an advisory-led approach. They are also actively leveraging the partnership ecosystem and making new acquisitions to augment their capabilities and improve the time-to-market of their offerings. Buyers are increasingly looking to partner with participants that can provide holistic support in the form of proactive guidance on industry best practices; customer experience design; and faster, cheaper, and better transformative models.

The full report includes the profiles of the following 34 leading banking operations service providers featured on the Banking Operations – Services PEAK Matrix® Assessment 2023:

- **Leaders**: Accenture, Cognizant, Genpact, HCLTech, Infosys, TCS, and Wipro
- **Major Contenders**: Avaloq, Capgemini, Coforge, Concentrix, Conduent, Datamatics, DXC Technology, Exela Technologies, EXL, Firstsource, FIS, IBM, Mphasis, NTT DATA, Sutherland Global Services, TaskUs, Tech Mahindra, Teleperformance, Volante, and WNS
- **Aspirants**: Atos, CGI, Conneqt, Equiniti, LTIMindtree, Virtusa, and Writer Business Services

Scope of this report

- **Geography**: Global
- **Providers**: 34
- **Services**: Banking
**Banking Operations services PEAK Matrix® characteristics**

**Leaders**

Accenture, Cognizant, Genpact, HCLTech, Infosys, TCS, and Wipro

- Leaders have a relatively broad set of capabilities across cards and payments, retail banking, lending, and commercial banking operations
- These companies have expanded their presence across all major geographies, including North America, Continental Europe, the UK, and APAC
- Leaders maintain a balanced mix of onshore, nearshore, and offshore delivery locations to provide cost arbitrage as well as flexibility to their clients

**Major Contenders**

Avaloq, Capgemini, Coforge, Concentrix, Conduent, Datamatics, DXC Technology, Exela Technologies, EXL, Firstsource, FIS, IBM, Mphasis, NTT DATA, Sutherland Global Services, TaskUs, Tech Mahindra, Teleperformance, Volante, and WNS

- Major Contenders are actively pursuing organic and inorganic investment opportunities to expand their capabilities and capture a larger market
- They are building capabilities to serve different geographies and LoBs while specializing in certain regions and segments
- These companies are making efforts to have a more balanced mix in their delivery footprints

**Aspirants**

Atos, CGI, Conneqt, Equiniti, LTIMindtree, Virtusa, and Writer Business Services

- Aspirants have a limited set of capabilities and smaller scale of operations, and, therefore, the market adoption of their services is low in the banking segment
- Due to lower market adoption, their client portfolios are limited
Everest Group PEAK Matrix®
Banking Operations – Services PEAK Matrix® Assessment 2023 | Wipro is positioned as a Leader

Assessments for Atos, Avaloq, Capgemini, Concentrix, Conneqt, Equiniti, EXL, CGI, IBM, Virtusa, Conduent, and Volante excludes provider inputs and are based on Everest Group’s proprietary Transaction Intelligence (TI) database, ongoing coverage of these providers, their public disclosures, and interaction with buyers. Please note that the data available to Everest Group for assessing these companies may be less comprehensive in some cases.

Wipro profile (page 1 of 6)

Overview

Company overview
Wipro Limited is a leading global information technology, consulting, and business process services company with gross revenue of US$10.3 billion in FY22-23. Wipro provides digital strategy advisory, customer-centric design, technology consulting, IT consulting, custom application design, development, reengineering and maintenance, systems integration, package implementation, cloud and infrastructure services, and business process services. It has over 243,128+ (as of March 2022) dedicated employees serving clients across six continents. It serves top retail banks, investment banks, leading card network associations, mortgage companies, and financial institutions in more than 60 markets.

Headquarters: Bengaluru, India  
Website: [www.wipro.com](http://www.wipro.com)

Key leaders
- Rishad Premji, Executive Chairman
- Thierry Delaporte, CEO and Managing Director
- Nagendra Bandaru, Managing iCORE business line
- Jasjit Singh Kang, Global Head, Digital Ops & Platforms
- Subramanian Sankaran, Practice Head, Banking Operations

Suite of services
- End-to-end operations – front- & back-office including origination and customer servicing across multiple channels and products
- Lending & mortgages
- Cards & payments
- Financial crime and compliance
- Risk & compliance
- Commercial banking
- Enterprise operations transformation
- Enterprise change services

Recent acquisitions and partnerships
- 2022: acquired Rizing – A global SAP consulting firm, significantly expanding its breadth of capabilities in helping businesses transform into intelligent enterprises
- 2021: Capco, a global management and technology consultancy providing digital, consulting, and technology services to financial institutions in the Americas, Europe, and the Asia Pacific. Pending regulatory approval
- 2021: Wipro acquired Encore Theme Technologies Private Limited (Encore Theme), a specialist in providing SaaS and cloud solutions in financial services
- 2021: Wipro acquired Ampion which is a leading Australian provider of cyber security, DevOps, and quality engineering services
- 2021: acquired Feedzai. Enterprise-wide fraud platform implementation & data-management solution that helps financial institutions prevent, detect, and remediate fraud risk
- 2021: acquired Quantexa, specialized in entity resolution, transaction monitoring, and AML
- 2020: acquired Rational Interaction, specialized in enhancing customer experience offerings and boosting digital marketing capabilities
- 2020: acquired Enate, process orchestration platform. Wipro partnered with Enate to increase process orchestration and upfront efficiency gain up to 20%. It has built strong use cases in BFS starting from lending, KYC, client on-boarding, card operations, and other verticals
- 2022: intelligent onboarding solution. This end-to-end customer life cycle management solution for financial institutes provides an edge over competitors by increasing agility in the process and on-time AI-based responsiveness to address customer requirements
- 2021: launched Instabase. This application platform can be used to understand unstructured data and automate business processes
- 2021: launched Cognitive Complaints Intake solution which enables classification of complaint vs non-complaint emails and automatic case creation post extraction of relevant case-related information
- 2021: launched Voice of Customer Analytics (VoCA), powered by Wipro HOLMESTM, that delivers rapid analysis & insight generation to show customer voice & agent performance
- 2020: implemented AWS solutions (through our multidisciplinary co-innovation center AWS Launch Pad) along with Calibrio WFO suite for our clients to drive modernization of customer-facing operations

Recent developments
- 2023: Enate – process orchestration platform. Wipro partnered with Enate to increase process orchestration and upfront efficiency gain up to 20%. It has built strong use cases in BFS starting from lending, KYC, client on-boarding, card operations, and other verticals
- 2022: intelligent onboarding solution. This end-to-end customer life cycle management solution for financial institutes provides an edge over competitors by increasing agility in the process and on-time AI-based responsiveness to address customer requirements
- 2022: Instabase. This application platform can be used to understand unstructured data and automate business processes
- 2021: launched Cognitive Complaints Intake solution which enables classification of complaint vs non-complaint emails and automatic case creation post extraction of relevant case-related information
- 2021: launched Voice of Customer Analytics (VoCA), powered by Wipro HOLMESTM, that delivers rapid analysis & insight generation to show customer voice & agent performance
- 2020: implemented AWS solutions (through our multidisciplinary co-innovation center AWS Launch Pad) along with Calibrio WFO suite for our clients to drive modernization of customer-facing operations

Strengths

- Wipro has continued its strong partnership-led model with FinTechs and is expanding its buyer segments in upcoming geographies. It recently signed a multi-year partnership with Finastra for the digital transformation of corporate banks in the Middle East
- Wipro has scaled its banking operations portfolio with an offering-led strategy for commercial lending, FCC, payments, and loan servicing. Clients are leveraging its BpaaS and omnichannel solutions, and HOLMES (AI platform) to extend their suite of services
- With its acquisition of Capco, Wipro will leverage its consulting capabilities and domain expertise to deliver services such as strategy, technology development, and implementation to BFS clients. It also partnered with Plaid on an API-based solution to help financial institutions manage data privacy, security, and customer experience
- With strategic acquisitions to fast-track its capability building in emerging areas, it acquired Ampion and Edgile in cybersecurity, LeanSwift in the cloud, CAS in telco and cable, and Rizing in SAP consulting
- With a growing delivery footprint, it has added centers in the US, the Philippines, and India, along with other countries, further bolstering its onshore, offshore, and nearshore capabilities

Limitations

- While it has rich experience in serving clients in North America, the UK, and now the Middle East as well, there exists scope to increase its penetration in Continental Europe, LATAM, and the ANZ regions
- Referenced buyers have highlighted the need to improve on proactiveness, relationship management, and communication

Services PEAK Matrix® evaluation dimensions

Measures impact created in the market – captured through three subdimensions

**Market adoption**
- Number of clients, revenue base, YoY growth, and deal value/volume

**Portfolio mix**
- Diversity of client/revenue base across geographies and type of engagements

**Value delivered**
- Value delivered to the client based on customer feedback and transformational impact

---

**Vision and strategy**
- Vision for the client and itself; future roadmap and strategy

**Scope of services offered**
- Depth and breadth of services portfolio across service subsegments/processes

**Innovation and investments**
- Innovation and investment in the enabling areas, e.g., technology IP, industry/domain knowledge, innovative commercial constructs, alliances, M&A, etc.

**Delivery footprint**
- Delivery footprint and global sourcing mix

---

**Vision & capability**
- Major Contenders
- Leaders
- Aspirants

---

Measures ability to deliver services successfully. This is captured through four subdimensions.
Everest Group confers the Star Performers title on providers that demonstrate the most improvement over time on the PEAK Matrix®

Everest Group selects Star Performers based on the relative YoY improvement on the PEAK Matrix.

In order to assess advances on market impact, we evaluate each provider’s performance across a number of parameters including:
- Yearly ACV/YoY revenue growth
- # of new contract signings and extensions
- Value of new contract signings
- Improvement in portfolio mix
- Improvement in value delivered

In order to assess advances on vision and capability, we evaluate each provider’s performance across a number of parameters including:
- Innovation
- Increase in scope of services offered
- Expansion of delivery footprint
- Technology/domain specific investments

We identify the providers whose improvement ranks in the top quartile and award the Star Performer rating to those providers with:
- The maximum number of top-quartile performance improvements across all of the above parameters AND
- At least one area of top-quartile improvement performance in both market success and capability advancement

The Star Performers title relates to YoY performance for a given vendor and does not reflect the overall market leadership position, which is identified as Leader, Major Contender, or Aspirant.
FAQs

Does the PEAK Matrix® assessment incorporate any subjective criteria?
Everest Group’s PEAK Matrix assessment takes an unbiased and fact-based approach that leverages provider / technology vendor RFIs and Everest Group’s proprietary databases containing providers’ deals and operational capability information. In addition, we validate/fine-tune these results based on our market experience, buyer interaction, and provider/vendor briefings.

Is being a Major Contender or Aspirant on the PEAK Matrix, an unfavorable outcome?
No. The PEAK Matrix highlights and positions only the best-in-class providers / technology vendors in a particular space. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is itself a favorable recognition.

What other aspects of the PEAK Matrix assessment are relevant to buyers and providers other than the PEAK Matrix positioning?
A PEAK Matrix positioning is only one aspect of Everest Group’s overall assessment. In addition to assigning a Leader, Major Contender, or Aspirant label, Everest Group highlights the distinctive capabilities and unique attributes of all the providers assessed on the PEAK Matrix. The detailed metric-level assessment and associated commentary are helpful for buyers in selecting providers/vendors for their specific requirements. They also help providers/vendors demonstrate their strengths in specific areas.

What are the incentives for buyers and providers to participate/provide input to PEAK Matrix research?
- Enterprise participants receive summary of key findings from the PEAK Matrix assessment
- For providers
  - The RFI process is a vital way to help us keep current on capabilities; it forms the basis for our database – without participation, it is difficult to effectively match capabilities to buyer inquiries
  - In addition, it helps the provider/vendor organization gain brand visibility through being included in our research reports

What is the process for a provider / technology vendor to leverage its PEAK Matrix positioning?
- Providers/vendors can use their PEAK Matrix positioning or Star Performer rating in multiple ways including:
  - Issue a press release declaring positioning; see our citation policies
  - Purchase a customized PEAK Matrix profile for circulation with clients, prospects, etc. The package includes the profile as well as quotes from Everest Group analysts, which can be used in PR
  - Use PEAK Matrix badges for branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.)
- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with Everest Group; please contact your CD or contact us

Does the PEAK Matrix evaluation criteria change over a period of time?
PEAK Matrix assessments are designed to serve enterprises’ current and future needs. Given the dynamic nature of the global services market and rampant disruption, the assessment criteria are realigned as and when needed to reflect the current market reality and to serve enterprises’ future expectations.
