Everest Group PEAK Matrix® for Healthcare Payer Operations Service Provider 2022

Focus on Wipro
March 2022
Background of the research
Healthcare Payer Operations 2022

The healthcare industry is one of the fastest-changing and most dynamic sectors, making it essential for organizations to constantly evolve and build on their foundational capabilities. The global pandemic has brought certain opportunities to the forefront such as telehealth, risk-based commercial models, and greater investment in care management, all coupled with an increased focus on digital initiatives, especially automation and analytics.

In order to achieve this, service providers are establishing strong ecosystem partnerships with leading third-party vendors, developing technology solutions, deploying innovative models such as Business-Process-as-a-Service (BPaaS) and payvider solutions for service delivery, and strengthening their consulting capabilities to provide end-to-end transformation for their clients.

In order to achieve their objectives in this regard, third-party support becomes vital, and hence, it becomes extremely important for healthcare payers to identify the right service providers to transform their business processes and help differentiate themselves. This report studies leading healthcare payer BPS providers and compares their capabilities in detail.

The full report includes the profiles of the following 32 leading healthcare payer BPS providers featured on the Healthcare Payer Operations PEAK Matrix®:

- **Leaders:** Accenture, Cognizant, Conduent, EXL, Firstsource, HGS Healthcare, NTT DATA, Optum, and Wipro
- **Major Contenders:** Apexon Health, Capgemini, CGI, Change Healthcare, Concentrix, Convey Health, CorroHealth, Exela Technologies, Gainwell Technologies, Genpact, HCL Technologies, Hexaware, Infosys, Mphasis, Shearwater Health, Sutherland Global Services, TCS, and WNS
- **Aspirants:** Atos, Omega Healthcare, Tech Mahindra, Teleperformance, and Virtusa

Scope of this report

- **Geography:** Global
- **Service providers:** 32
- **Services:** Healthcare payer BPS
Everest Group Healthcare Payer Operations PEAK Matrix® characteristics

Everest Group classified 32 healthcare payer BPS providers on the Everest Group PEAK Matrix® into the three categories of Leaders, Major Contenders, and Aspirants. The PEAK Matrix® is a framework to assess the absolute market success and overall capability of service providers.

**Leaders:**
There are nine service providers in the Leaders category – Accenture, Cognizant, Conduent, EXL, Firstsource, HGS Healthcare, NTT DATA, Optum, and Wipro

**Major Contenders:**
The Major Contenders category has 18 service providers – Apexon Health, Capgemini, CGI, Change Healthcare, Concentrix, Convey Health, CorroHealth, Exela Technologies, Gainwell Technologies, Genpact, HCL Technologies, Hexaware, Infosys, Mphasis, Shearwater Health, Sutherland Global Services, TCS, and WNS

**Aspirants:**
There are five service providers in the Aspirants category – Atos, Omega Healthcare, Tech Mahindra, Teleperformance, and Virtusa

## Overview

Recent acquisitions and partnerships

- **2020-21:** partnered to drive end-to-end BPaaS along with HealthEdge, Plexis, Medversant, and CHC. Partnership with Raziel Telehealth to drive remote patient monitoring, virtual health, and telemedicine. Partnership with Innovacer, Esseste, and Zeomega to drive population health management care coordination and disease management. Partnership with Uniphore to drive omnichannel experience across member & provider communication on the backbone of sentiment/behavior analytics to drive NPS/CSAT.

- **2019:** partnered with a global conversational AI company, providing AI-enabled conversational automation and analytics (speech), conversational assistant, and voice biometrics solutions. Wipro has collaborated with Innovaccer for interoperability and healthcare analytics and partnered with Medversant for provider lifecycle management.

- **2018:** acquired Cooper and Syfte to enhance connected healthcare services, member journey mapping (DesignIT), access crowdsourcing community, and design thinking techniques.

Recent developments

- **2020-21:** invested in a payer business transformation framework “Digitized Health Experience” through consulting and digital-first approach, driven by a combination of domain consultants, automation, and technology to transform and predict operations.

- **2021:** launched a new analytics solution that uses pre-defined applications to uncover business insights.

- **2020:** launched NCQA-certified provider lifecycle management through platform solution providers in the provider contracting, screening, monitoring, and credentialing functions. Launched population health and care management platform solution providing member-centric view, automated assessments, care planning, and flexible care coordination workflow.

- **2018:** launched consulting-led member/provider journey mapping and population health analytics reporting.

### Company overview

Wipro Limited is a global information technology, consulting, and business process services company that offers cognitive computing, hyper-automation, robotics, cloud, analytics, and emerging technologies to help clients adapt to the digital world. With over 210,000 employees, the company serves clients across six continents.

### Key leaders

- **Rishad Premji,** Chairman
- **Thierry Delaporte,** Chief Executive Officer & Managing Director
- **Srinivas Pallia,** President & CEO – Americas 1, Strategic Market Units
- **Nagendra Bandaru,** SVP & Chief Executive, DOP
- **Jasjit Singh Kang,** SVP & Head – Healthcare, Insurance, and BFS
- **Mohd. Haque,** SVP & Global Head, Healthcare
- **Prashant Kulkarni,** Vice President Health, DOP

<tbody>
<tr>
<td>Raziel health</td>
<td>Network management and care management</td>
<td>2021</td>
<td>It is a continuous care platform, which is cloud-based and uses AI and ML to provide premier care to patients at home. Raziel performs real-time monitoring and collects and curates vitals and lifestyle data at the patient- and population-level in order to deliver actionable, tactical insights. This, in turn, means improved financial health for providers and health plans.</td>
<td>1</td>
</tr>
<tr>
<td>Clinical review – digitize notes bot, medical &amp; RX ontology, and research-assisted bots</td>
<td>Claims management, care management, and risk &amp; compliance</td>
<td>2021</td>
<td>It helps in digitization of intake notes via platform or scanned documents. It also helps to classify information provided in medical notes through medical ontology developed on Holmes. Its built-in assisted bots unify information for evaluating approval or denial of claim.</td>
<td>1</td>
</tr>
<tr>
<td>Base)TM</td>
<td>All</td>
<td>2019</td>
<td>It is Wipro’s comprehensive BPM, embedded analytics, and project management platform that is a fully integrated end-to-end business operations platform enabling agile transformation.</td>
<td>3</td>
</tr>
<tr>
<td>Icertis</td>
<td>Network management</td>
<td>2019</td>
<td>It is a contract management platform that solves contract management problems by transforming contracts into strategic business assets, giving global enterprises powerful new capabilities to maximize revenue, control costs, and manage risk.</td>
<td>2</td>
</tr>
<tr>
<td>Provider data intake and triage bots</td>
<td>Network management</td>
<td>2018-21</td>
<td>It provides intake of multiple format provider demographics and contract types. It analyzes unstructured sources, auto-cleanses, auto-detects, and triages documents to network management teams. It provides virtual gatekeeping before clarifications are raised to onshore managers / SME. There is unified synchronization of data across multiple payer platforms.</td>
<td>4</td>
</tr>
<tr>
<td>Smart adjudication claims engine</td>
<td>Claims management, care management, and risk &amp; compliance</td>
<td>2018-21</td>
<td>It provides auto-processing of claim fallouts from the auto-adjudicator and auto-calculation of payable interest amount. It provides assisted and automated research to reduce average handling time with an enhanced processing tool. It assists in predictive inventory segregation of workable and non-workable claims. It also provides auto-correction bots for resolution of potential under/over payment edits and predictive models (anomaly detection) for proactive identification of potential FWA claims/payments.</td>
<td>5</td>
</tr>
<tr>
<td>Appeals – appeal intake &amp; digitize engine, data extraction engine, and case setup bot</td>
<td>Claims management, care management, and risk &amp; compliance</td>
<td>2018-21</td>
<td>It provides intake of appeals, detection of appeals and grievances, analysis of unstructured documents, and case set-up with data extraction and population on client applications.</td>
<td>1</td>
</tr>
<tr>
<td>NPS and sentiment analytics</td>
<td>Member engagement</td>
<td>2018</td>
<td>It is a solution that helps in analyzing member experience during annual enrollment period or open enrollment period and provide insights to improve member experience.</td>
<td>5</td>
</tr>
<tr>
<td>Payer-in-a-Box (BPaaS)</td>
<td>Claims management, member engagement, and network management</td>
<td>2018</td>
<td>It is a combination of Wipro in-house tools along with partners (HealthEdge, Medversant, Plexis, and CAQH) to enable an end-to-end BPaaS solution for Medicare and Medicaid customers.</td>
<td>5</td>

**Measure of capability:** Low 🟢 High 🟣

### Strengths

- Wipro has actively started investing in clinical services, especially in functions such as health risk assessment, medical coding, and nursing support. Considering that clinical services are a key focus area for payers, these investments are likely to help it gain share in the fast-growing market segment.

- Wipro’s Member-360, a comprehensive member management platform has been deployed by a lot of customers. Utilizing this platform helps the members to reduce improper claim payments, lessen the administrative burden and cost to support enrollment, and decrease the number of appeals and grievances.

- It is focusing on building an extensive network of strategic partners and vendors. For instance, Wipro’s partnership with Change Healthcare for its M-360 product and collaboration with Raziel Telehealth to drive remote patient monitoring have been seen as steps in the right direction to leverage the capabilities of third-party organizations to build a holistic solution to address payer needs.

- The healthcare payer market is experiencing an increase in the penetration of new generation technologies and platforms to address problems. The launch of Wipro Digital Academy to build a strong team of engineers showcases its focus on enhancing its innovation and automation-related capabilities.

### Limitations

- The changing business needs of healthcare payers are resulting in growth opportunities from an outsourcing perspective in new segments such as risk adjustment, HEDIS, STAR ratings support, and payvider operations support. Wipro’s investments in these areas are currently limited.

- Over the past few years, the healthcare industry has seen a push toward value-based care. Wipro’s current share of care management operations is limited as compared to other major players in the industry.

- Payment integrity and fraud detection and its management are areas of significant investment for health plans. Wipro’s current focus on this segment is less as compared to its peers.
Appendix
Everest Group PEAK Matrix® is a proprietary framework for assessment of market impact and vision & capability

**Everest Group PEAK Matrix**

- **Market Impact**: Measures impact created in the market.
- **Vision & Capability**: Measures ability to deliver services successfully.

**Categories**:
- **Leaders**
- **Major Contenders**
- **Aspirants**

Proprietary & Confidential. © 2022, Everest Global, Inc. | EGR-2022-53-E-5023
Services PEAK Matrix® evaluation dimensions

Measures impact created in the market – captured through three subdimensions

Market adoption
Number of clients, revenue base, YOY growth, and deal value/volume

Portfolio mix
Diversity of client/revenue base across geographies and type of engagements

Value delivered
Value delivered to the client based on customer feedback and transformational impact

Vision and strategy
Vision for the client and itself; future roadmap and strategy

Scope of services offered
Depth and breadth of services portfolio across service subsegments/processes

Innovation and investments
Innovation and investment in the enabling areas, e.g., technology IP, industry/domain knowledge, innovative commercial constructs, alliances, M&A, etc.

Delivery footprint
Delivery footprint and global sourcing mix

Measures ability to deliver services successfully. This is captured through four subdimensions

Market impact

Leaders
Major Contenders
Aspirants
Everest Group PEAK Matrix® for Healthcare Payer Operations Service Provider 2022

**Methodology**

Everest Group selects Star Performers based on the relative YOY improvement on the PEAK Matrix.

In order to assess advances on **market impact**, we evaluate each provider’s performance across a number of parameters including:
- Yearly ACV/YOY revenue growth
- # of new contract signings and extensions
- Value of new contract signings
- Improvement in portfolio mix
- Improvement in value delivered

In order to assess advances on **vision and capability**, we evaluate each provider’s performance across a number of parameters including:
- Innovation
- Increase in scope of services offered
- Expansion of delivery footprint
- Technology/domain specific investments

We identify the providers whose improvement ranks in the top quartile and award the Star Performer rating to those providers with:
- The maximum number of top-quartile performance improvements across all of the above parameters AND
- At least one area of top-quartile improvement performance in both market success and capability advancement

---

The Star Performers title relates to YOY performance for a given vendor and does not reflect the overall market leadership position, which is identified as Leader, Major Contender, or Aspirant.
FAQs

Does the PEAK Matrix® assessment incorporate any subjective criteria?
Everest Group’s PEAK Matrix assessment adopts an unbiased and fact-based approach (leveraging provider / technology vendor RFIs and Everest Group’s proprietary databases containing providers’ deals and operational capability information). In addition, these results are validated / fine-tuned based on our market experience, buyer interaction, and provider/vendor briefings.

Is being a “Major Contender” or “Aspirant” on the PEAK Matrix, an unfavorable outcome?
No. The PEAK Matrix highlights and positions only the best-in-class providers / technology vendors in a particular space. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is itself a favorable recognition.

What other aspects of PEAK Matrix assessment are relevant to buyers and providers besides the “PEAK Matrix position”?
A PEAK Matrix position is only one aspect of Everest Group’s overall assessment. In addition to assigning a “Leader”, “Major Contender,” or “Aspirant” title, Everest Group highlights the distinctive capabilities and unique attributes of all the PEAK Matrix providers assessed in its report. The detailed metric-level assessment and associated commentary is helpful for buyers in selecting particular providers/vendors for their specific requirements. It also helps providers/vendors showcase their strengths in specific areas.

What are the incentives for buyers and providers to participate/provide input to PEAK Matrix research?
- Participation incentives for buyers include a summary of key findings from the PEAK Matrix assessment.
- Participation incentives for providers/vendors include adequate representation and recognition of their capabilities/success in the market place, and a copy of their own “profile” that is published by Everest Group as part of the “compendium of PEAK Matrix providers” profiles.

What is the process for a provider / technology vendor to leverage their PEAK Matrix positioning and/or “Star Performer” status?
- Providers/vendors can use their PEAK Matrix positioning or “Star Performer” rating in multiple ways including:
  - Issue a press release declaring their positioning. See citation policies.
  - Customized PEAK Matrix profile for circulation (with clients, prospects, etc.)
  - Quotes from Everest Group analysts could be disseminated to the media.
  - Leverage PEAK Matrix branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.)
- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with the designated POC at Everest Group.

Does the PEAK Matrix evaluation criteria change over a period of time?
PEAK Matrix assessments are designed to serve present and future needs of the enterprises. Given the dynamic nature of the global services market and rampant disruption, the assessment criteria are realigned as and when needed to reflect the current market reality as well as serve the future expectations of enterprises.
Everest Group is a research firm focused on strategic IT, business services, engineering services, and sourcing. Our research also covers the technologies that power those processes and functions and the related talent trends and strategies. Our clients include leading global companies, service and technology providers, and investors. Clients use our services to guide their journeys to maximize operational and financial performance, transform experiences, and realize high-impact business outcomes.
