

# Reimagine your **Digital Campus** with the right technology partner!

The COVID-19 pandemic brought about a paradigm shift in learning and accelerated a technology transformation across campuses. While online learning is a mature concept for many internet-based colleges, the pandemic accelerated acceptance of on-line learning as the new normal. Yet, for some universities, dealing with legacy processes triggered complexity and inefficiency in their drive to on-line.

Wipro's research envisages an exciting future where universities can capture a larger share of a growing market for remote learning. To accomplish this, universities must adopt a more dynamic operating model and cost structure to reduce expenditures and redirect funds to high-growth opportunities.

Wipro helps universities by driving human-centric, digital-first solutions. Whether it is automating student enrollment, implementing digital learning

and assessment technologies, enhancing the university's infrastructure or mitigating security risks, Wipro's blueprint for a technology enabled campus helps leaders optimize student engagement and enhance efficiencies, all in a secure environment.

We combine robotic process automation, analytics and AI, augmented reality, cloud migration, 5G networks, and advanced threat protection to create a self-funding approach for realizing the modern digital campus.

Gartner has positioned Wipro as a 'Leader' in digital transformation. With its heritage of innovation and entrepreneurship, Wipro helps universities attain their **digital campus goals**.
