

A photograph of two men in business attire looking at a laptop. One man is sitting and pointing at the screen, while the other is standing and leaning over him. The laptop screen displays a dashboard with a world map, pie charts, and bar graphs. A large green-to-blue gradient circle is overlaid on the left side of the image, containing the main title.

Wipro's Multi Domain Orchestrator for global network management

Wipro's Multi Domain Orchestrator (MDO) brings agility to deliver and manage network services in a complex multi-domain enterprise network (LAN, WAN, data center and Cloud).

MDO brings competitive advantage of enterprise network by robust automation of underlying physical and virtual infrastructure.

Key takeaways

Achieve network standardization across global organization with MDO's three key functionalities

Design and deploy network using available templates for small/medium/large sites

Configuration and provisioning – Deploy devices using prescriptive configurations with minimal clicks

Centralized policy control and user based access management

Key benefits

Visualize, implement and abstract business intents without knowing their network implication

Transform business with agile delivery of network services reliably and accurately

End-to-end view of cross domain assurance, segmentation and complimentary technologies for LAN, WAN, data center and Cloud

Lower cost of ownership. Restrict non-standard deployments and increase uptime with policy driven provisioning and guided remediation

Key features

- Flexible service chaining and correlating over network domains such as LAN, WAN, DC and Cloud
- Extendible through plug and play architecture to ITSM, security or third party network services into a single console
- Take advantage of pre-defined templates on network fabric, policy or configuration
- Inbuilt assurance provides 360 degree visibility of the multidomain network from single console

Unleash the benefits of Intent Based Networking with simplified network management
