

# Energy trader's digital assistant

A trader's personal search engine

Time is of crucial essence to players in the trading world. Every second counts. Getting the right information in short time enables traders/operators to make better and more profitable trading decisions. To enable this decision making, Wipro has built a digital assistant for traders to access information at their fingertips.

Wipro's Energy trader's digital assistant app searches, examines, organizes and presents business critical information spread across the organization in a comprehensible format.

## Key takeaways:

Voice enabled app that can be embedded across multiple relevant applications

Designed to be trader's personal search engine

Accessibility to key metrics helps in better decision making, advantageous during meetings and discussions, presentations

Updated information across the supply chain to make profitable decisions

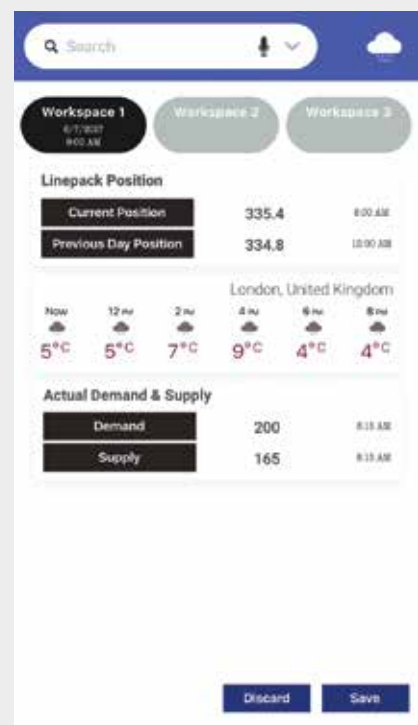

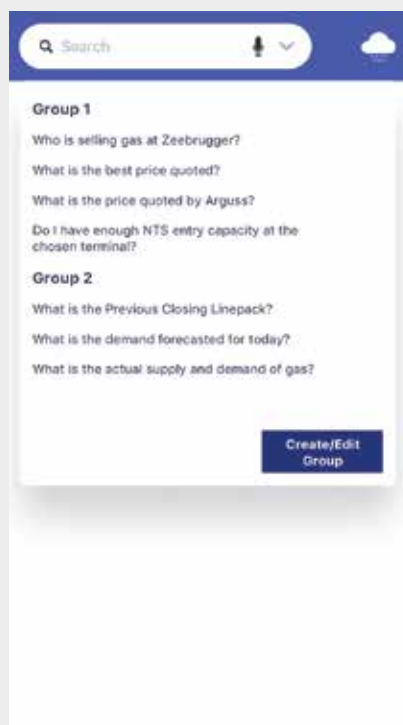

## Benefits:

- Make faster decisions more accurately with better insights
- Retrieve information quickly at your fingertips
- Optimize time with personal assistant to make key decisions based on your inputs

## Features:

- Provide instant information at the trader's fingertips
- Can be embedded across multiple front/mid and back office systems (E.g. ETRM systems, risk metrics calculators, credit risk systems, price feed systems, temperature & weather data, reporting systems, logistics systems, etc.)
- Intelligent aggregation of information via Natural Language Processing
- Make decisions based on trader's inputs (E.g. Create deals and input them directly into ETRM systems)

## Information retrieval with voice instructions
