

A man in a blue and white checkered shirt is standing in a factory, holding a silver laptop. He is looking at the laptop screen. In the background, there is a large industrial machine, possibly a CNC lathe, with a white and black body. The factory has blue walls and a white ceiling with recessed lighting.

Wipro's Intelli Assets

Powered by Wipro Looking Glass - an industrial internet platform

Wipro's Intelli Assets leverages exponential technologies to enable advanced asset management. It maximizes the asset utilization potential by empowering assets to make autonomous decisions.

Leveraging IoT, blockchain, smart contracts and advanced analytics to make autonomous intelligent decisions

Enables advanced asset management and real-time tracking of assets with IoT core.

Delivers intelligence and insights to drive business outcomes.

Integrates IoT data and automates execution of smart contracts for enabling transparency and trust in business processes.

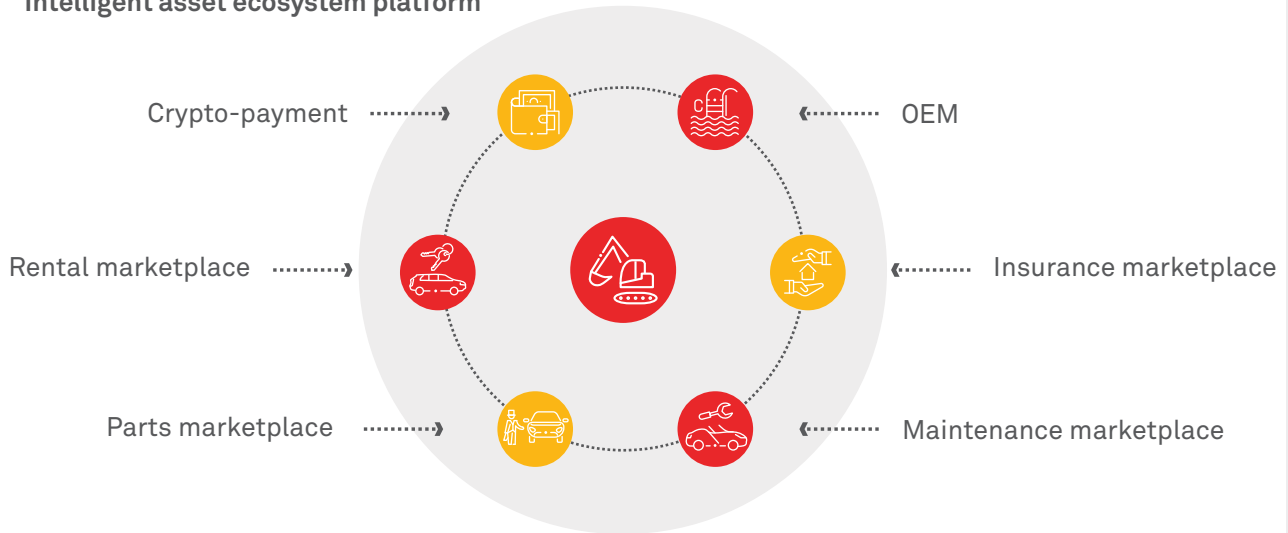

Powers transactions amongst key business partners through a standardized peer-to-peer messaging and payment framework.

Key benefits

- Realizes asset's lifetime value with increased service revenue
- Maximizes the asset utilization potential
- Enables trust and transparency among business stakeholders by direct integration of IoT data and smart contracts
- Real-time payment settlements by removing intermediaries
- Reduces downtime/idle-time for high-value industrial assets

Intelligent asset ecosystem platform

Solution features

Salient features

N-Scale architecture from looking glass

Semantic graph data model

Context-driven collaboration

Automated smart contract management

Real-time settlements

What it enables for you

Scales infinitely to handle the volume of assets

Models relationships linking assets, their components, users, roles, organizations, etc.

Accelerates machine-to-machine, machine-to-human, and human-to-machine collaboration

Uses dynamic rules & NLP to create business agreements and smart contracts

Enables transactions between different stakeholders-including machines-using blockchain technology
