Everest Group’s PEAK Matrix™ for Capital Markets AO Service Providers

Focus on Wipro
September 2016
Background and scope of the research

Background of the research

- The capital markets industry is grappling with high regulatory pressures, intense competition, and an uncertain economy. As a result of stagnated growth and a non-conducive environment to grow top-line, cost containment has become a single-most important area of focus for capital markets. Financial services firms are adopting different business levers to contain costs and improve profitability. They are adopting disruptive business models, mutualizing costs through shared utilities, and investing in digital technologies to stay ahead of competition. Buy-side and sell-side participants, as well as financial intermediaries are investing in risk & compliance management solutions, automation, mobility, big data & analytics, Blockchain, and third-party platforms, as they focus on cost reduction, standardization, and portfolio rationalization.

- With the capital markets industry witnessing a number of changes, IT service providers are helping clients to manage their budgets more effectively with cost reduction initiatives, and are looking to provide offerings that are tailored to the firms’ cost containment strategies. Service providers are accelerating their investments in automation to reduce costs, collaborating with buyers to invest in innovation, investing to provide customer-centric digital services, and forming alliances with leading platform providers to meet different client needs.

- In this research, we analyze the capabilities of 27 leading AO service providers, specific to the global capital markets sector. These providers were mapped on the Everest Group Performance | Experience | Ability | Knowledge (PEAK) Matrix™, which is a composite index of a range of distinct metrics related to each provider’s capability and market success. Additionally, Everest Group has also profiled the capabilities of these 27 service providers in detail including a comprehensive picture of their service suite, scale of operations, scope, domain expertise & innovation, delivery footprint, and buyer satisfaction specific to banking AO services.

This document focuses on Wipro’s capital markets AO experience and includes:

- Overview of the capital markets AO service provider landscape
- Everest Group’s assessment of Wipro’s delivery capability and market success on PEAK Matrix
- Detailed capital markets AO profile for Wipro
This report examines the service provider landscape for large (TCV > US$25 million), annuity-based, multi-year ( >3 years) application services relationships in the global capital markets sector

NOT EXHAUSTIVE

Banking
- Retail banking (B2C1)
- Lending
- Cards and payments
- Commercial banking (B2B2)

Capital markets
- Investment banking
- Asset management
- Custody and funds administration
- Brokerage
- Others 3

Insurance
- Life and pensions
- Property and casualty
- Others

Focus of report

Services industry

IT Infrastructure Outsourcing (IO)
- Traditional IO
- Remote Infrastructure Management (RIM)
- Infrastructure Management Services (IMS)
- Cloud

IT Application Outsourcing (AO)
- Application development
- Application maintenance
- Independent testing
- Package implementation
- ERP services
- Business intelligence / data warehousing

Business Process Outsourcing (BPO)
- BFSI-specific BPO
- HRO
- FAO
- PO
- Contact center
- Knowledge services

Consulting
- IT strategy / operations consulting
- Business consulting
- Infrastructure consulting
- Infrastructure rollouts

Digital Services
Services in next-generation technologies leveraged by enterprises to enable transformation including social, mobility, analytics, cloud, and others (Artificial Intelligence (AI), Robotics Process Automation (RPA), Internet of Things (IoT), Machine-to-Machine (M2M), etc.)

1 Business-to-consumer relationships
2 Business-to-business relationships
3 Includes other capital markets functions such as structured finance, treasury, FX, and horizontal functions including risk management

This report is a part of Everest Group’s series of reports focused on ITO in BFSI in 2016

### IT Outsourcing in BFSI – Annual Report

Each report provides:
- An overview of the application services market for the BFSI vertical, capturing key trends in market size, growth, drivers & inhibitors, adoption trends, regional/functional break-outs of the market, emerging themes, key areas of investment, and implications
- Key movements in volumes/values of AO transactions, evolving trends, market dynamics, and emerging priorities of buyers in the last 12 months

### IT Outsourcing in BFSI – Service Provider Landscape and Profiles Compendium

Each report provides:
- Assessment of service provider landscape in AO services and mapping of providers on Everest Group’s PEAK Matrix™ – as Leaders, Major Contenders, and Aspirants
- Benchmarking scale, scope, domain investments, and delivery footprint of each provider’s BFSI-AO practice along with comparative evaluation of their BFSI-AO capabilities
- The 2016 BFSI-AO PEAK Matrix analyses focus on identifying the “Star Performers”, i.e., providers with the strongest forward movement over time – both in terms of market success and capability advancements
- Capability profiles of service providers capturing their AO services experience in specific subverticals including details such as AO services capabilities, key investments, proprietary solutions, and technological expertise

### Enterprise Digital Effectiveness with APEX Matrix

Two reports as part of an “open source” evaluation of the digital effectiveness of the largest retail banks in Europe and United States and mapping them on Everest Group’s APEX Matrix – as Leaders, Optimizers, Innovators, and Aspirants
Everest Group’s capital markets research is based on two key sources of proprietary information

1. Everest Group’s proprietary database of 400+ large, active, multi-year AO contracts within capital markets (updated annually). The database tracks the following elements of each large AO relationship:
   - Buyer details including industry, size, and signing region
   - Contract details including TCV, ACV, term, start date, service provider FTEs, and pricing structure
   - Activity broken down separately for banking, capital markets, insurance, and by line of business (for example, investment banking, asset management, custody, fund administration, and brokerage)
   - Scope includes coverage of buyer’s geography as well as functional activities
   - Global sourcing including delivery locations and level of offshoring

2. Everest Group’s proprietary database of operational capability of 25+ capital markets AO service providers (updated annually)
   - The database tracks the following capability elements for each service provider:
     - Major capital markets AO clients and recent wins
     - Overall revenue
     - Recent capital markets-related developments
     - Capital markets AO delivery locations
     - Capital markets AO service suite
     - Domain capabilities, proprietary solutions, and intellectual property investments

Service providers covered in the analysis

Assessment for Accenture, Atos, HPE, Mphasis, Synechron, and Quinnox excludes service provider inputs, and is based on Everest Group’s proprietary Transaction Intelligence (TI) database, service provider public disclosures, and Everest Group’s interactions with capital markets buyers

Analysis for Dell Services based on capabilities before being acquired by NTT DATA

Analysis based on capabilities before the merger of CSC and HPE Services

Note: We continuously monitor market developments and track additional service providers beyond those included in the analysis

Confidentiality: Everest Group takes its confidentiality pledge very seriously. Any information, that is contract-specific, will be presented back to the industry only in an aggregated fashion

EGR-2016-11-E-1916
Wipro is differentiating its capital markets IT services by investing in an IP-based model through in-house development, partnerships, and co-innovation efforts with clients to deliver platform-based services. Wipro has witnessed significant demand in the risk and regulatory compliance segment, achieving double-digit growth rate for its capital markets IT services revenue in 2015. Wipro has offered aggressive pricing in winning new clients and in some cases also made investments and took upfront risks to demonstrate client value and confidence in their delivery.

**Strengths**
- Investments in building platform-based services – shared utilities providing non-core commoditized functions for capital markets firms
- Ability to offer integrated IT & operations support to clients and focused investments in product & domain expertise are the key winning themes
- Focused partnerships and co-innovation efforts with clients

**Areas of improvement**
- Expand its front-office capabilities and continue investing in enhancing its market-facing IP
- Drive growth in its European capital markets business by enhancing its delivery footprint in Europe to ensure quicker ramp-up
- Needs to further enhance its domain and consulting expertise

### Application services scope

Appendix
Everest Group’s PEAK Matrix™ is a composite index of a range of distinct metrics related to a service provider’s scale, scope, technology/domain expertise & innovation, delivery footprint, buyer satisfaction, and resultant market success in the context of a given outsourcing function.
Dimensions of service providers’ capability and market success underlying the PEAK Matrix™ for capital markets AO services

Everest Group PEAK Matrix

- Leaders
- Major Contenders
- Aspirants

Yearly capital markets specific AO revenue growth
Capital markets AO revenue in CY2015
Number of large, active capital markets AO deals

Market success

Delivery capability

Scale
- Total company revenue
- Contribution of capital markets specific AO revenue to the total company revenue

Scope
- Lines of Business (LoBs) served
- AO subfunctions served
- Geographies served

Domain expertise & innovation
- Innovation / IP/ proprietary solutions
- M&A, alliances, and other investments

Delivery footprint
- Delivery mix
- Number of delivery centers and regions covered

Buyer satisfaction
- Buyer perception score
Does the PEAK Matrix assessment incorporate any subjective criteria?
- The Everest Group’s PEAK Matrix assessment adopts an objective and fact-based approach (leveraging service provider RFIs and the Everest Group’s proprietary databases containing providers’ deals and operational capability information). In addition, these results are validated / fine-tuned based on our market experience, buyer interaction, and provider briefings.

Is being a “Major Contender” or “Aspirant” on the PEAK Matrix an unfavorable outcome?
- No. PEAK Matrix highlights and positions only the best-in-class service providers in a particular functional/vertical. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is in itself a favorable recognition.

What other aspects of the PEAK Matrix assessment are relevant to buyers and providers besides the “PEAK Matrix position”?  
- The PEAK Matrix position is only one aspect of the Everest Group’s overall assessment. In addition to assigning a “Leader”, “Major Contender” or “Aspirant” title, Everest Group highlights the distinctive capabilities and unique attributes of all the PEAK Matrix providers assessed in its report. The detailed metric level assessment and associated commentary is helpful to the buyers in selecting particular providers for their specific requirements. It also helps providers showcase their strengths in specific areas.
What are the incentives for buyers and providers to participate / provide input to the PEAK Matrix research?

- Participation incentives for buyers include a summary of key findings from the PEAK Matrix assessment.
- Participation incentives for providers include adequate representation and recognition of their capabilities/success in the market place, and a copy of their own “profile” that is published by Everest Group as part of the “compendium of PEAK Matrix providers” profiles.

What is the process for a service provider to leverage their PEAK Matrix positioning status?

- Providers can use their PEAK Matrix positioning in multiple ways including:
  - Issue a press release declaring their positioning/rating
  - Customized PEAK Matrix profile for circulation (with clients, prospects, etc.)
  - Quotes from the Everest Group’s analysts could be disseminated to the media
  - Leverage the PEAK Matrix branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.)

- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with the designated PoC at Everest Group.
About Everest Group

Everest Group is a consulting and research firm focused on strategic IT, business services, and sourcing. We are trusted advisors to senior executives of leading enterprises, providers, and investors. Our firm helps clients improve operational and financial performance through a hands-on process that supports them in making well-informed decisions that deliver high-impact results and achieve sustained value.
