

Wipro iX Solutions Connect

Bringing together people and
expertise to get work done

According to a recent survey, 90% of field service organizations indicated that real-time communication is either mission critical or very important to their field workers being able to do their jobs effectively.

Connect is an augmented reality app, that provides your employees insights at the exact moment it is needed. All manuals. All videos. All experts. Whenever they need it.

Simply choose the asset, select the procedure, and Connect does the rest.

- **Troubleshoot real time.** Field teams can share their real-time view with experts in remote locations to get the help they need, when they need it.
- **Communicate instructions visually.** Use arrows, icons, and drawings augmented over real objects rather than audio-based instructions.
- **Scale expert knowledge.** Enable experts from anywhere in the world to effectively share their knowledge.
- **Walk the site without being onsite.** Perform remote inspections—combine video, screenshots, and annotations for more seamless workflows on the devices you already use.
- **Increase asset uptime while reducing service costs.** Travel less and increase time spent resolving field issues and improve first-time fix rates.

Access to **the expert** you need, when you need them.

Features

- Asset knowledge library
- Expert directory and availability
- Video calls with experts
- Augmented reality annotation
