Wipro and Oracle partner to accelerate digital transformation at Sanepar towards cloud

The move will allow Sanepar to improve business processes, accelerate decision-making and deploy high-performance technology in an evolving market under Brazil's new legal framework

São Paulo, Brazil and Bangalore, India - February 11, 2022: Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO), a leading global information technology, consulting and business process services company, today announced that it has been engaged by Sanepar (Paraná Sanitation Company) to lead the process of deploying a business management solution in the cloud, resulting in a significant acceleration of its digital transformation, in partnership with [Oracle](#). Under the agreement, Wipro will lead the migration of Sanepar's Back Office operations to [Oracle Cloud Enterprise Resource Planning \(ERP\)](#).

The move to the cloud will provide Sanepar with accurate, real-time insights into its business processes, accelerate decision-making and improve customer service in a rapidly evolving market environment under the new legal framework. The new Basic Sanitation Legal Framework in Brazil (Bill 4162/2019) is designed to expand the reach of water and sanitation services to at least 90 percent of all Brazilian households by the year 2033.

The new legal framework also opens the market for private investment, creating an opportunity for collaboration between public and private companies. The move to a cloud-based ERP system will increase Sanepar's competitiveness and agility, allowing it to gain real-time insights into financial, operational, customer relationship management processes and will drive process acceleration as they continue to expand their operations.

“Sanepar seeks to promote institutional transformation through the implementation of an integrated solution for business management oriented by processes, in addition to technological modernization using cloud solutions. The expected benefits include increased reliability of information and contributions to productivity, management, decisions and organizational strategies,” said **Gislaine Lopes, ERP Project Sponsor, Sanepar**.

Priscila Brunetta, Administrative Director, Sanepar, said, “The implementation of the solution provided by Wipro is an important step in Sanepar's digital evolution. Faced with a changing scenario in the regulatory framework of the sanitation sector in Brazil, Sanepar stands out by adopting measures to improve its level of excellence, which includes the use of new and advanced technologies in line with strategic organizational demands and best practices in market.”

The migration to the cloud ensures reliability in processes and performance for all applications that Sanepar may use now or in the future. “Sanepar is going through a moment of transformation and Oracle Cloud ERP is key in offering the ability to automate and manage key financial data on

a single, highly secure and scalable cloud platform. This robust cloud makes workload migration planning successful and ensures complete cloud manageability,” explained **Rodrigo Solon, Vice President of Applications for Oracle Brazil**.

Wipro will implement new business processes on the cloud-based [Oracle ERP](#) solution which offers the benefits of reduced infrastructure costs, standardization and integration of business processes in addition to a high level of operational efficiency in the company. “Wipro's solution meets all of the customer's needs, and the partnership with Oracle takes real innovation to the public sector,” said **Douglas Silva, Vice President and Country Head, Brazil, Wipro Limited**.

Leveraging [Wipro FullStride Cloud Services](#), Oracle Cloud ERP will cater to the volume of traffic generated by Sanepar. In addition, the solution also offers operational agility, compliance, and transparency gains through increased quality of information and reliability of strategic insights for Sanepar's business. Planning for the ERP implementation at Sanepar has begun and the migration will be carried out following the provisioning of environments.

Note: The deal was highlighted in Wipro Limited's financial results announcement press release, dated January 12, 2022 for the quarter ended December 31, 2021 (Q3 FY21-22), with a description of Sanepar, but without naming the company.

About Wipro Limited

Forward-looking statements

The forward-looking statements contained herein represent Wipro's beliefs regarding future events, many of which are by their nature inherently uncertain and beyond Wipro's control. Such statements include, but are not limited to, statements about Wipro's growth prospects, its future financial operating results and its plans, expectations, and intentions. Wipro cautions readers that the forward-looking statements contained herein are subject to risks and uncertainties that could cause actual results to differ materially from the results anticipated by such statements. Such risks and uncertainties include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenues and profits, our ability to generate and manage growth, proposed full corporate actions, intense competition in IT services, our ability of maintaining our cost advantage, salary increases in India, our ability to attract and retain highly qualified professionals, time and cost burdens on fixed term contracts, customer concentration, immigration restrictions, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunications networks, our ability to successfully complete and integrate potential acquisitions, liability for damages in our service contracts, the success of companies in which we make strategic investments, withdrawal of government tax incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our business and industry. Conditions caused by the COVID-19 pandemic may decrease technology spend, negatively affect demand for our products, negatively affect customer spend rate and negatively affect our customers' ability or willingness to purchase our offerings, delay decision-making, purchasing potential customers, negatively affecting our ability to provide on-site consulting services, and our inability to deliver our customers or delaying the delivery of our offerings, all of which could negatively affect our future sales, results of operations and overall financial performance. Our operations may also be adversely affected by a number of external factors related to the COVID-19 pandemic that are not under our control. Additional risks that could affect our future results of operations are further described in our filings with the US Securities and Exchange Commission, including, but not limited to, Annual Reports on Form 20-F. These files are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statements that may be made from time to time by us or on our behalf.
