Business transformation powered by technology.

Digital transformation, cloud and cybersecurity are no longer debated — they are table stakes for winning business models.

Enterprises are focused on how to use technology to navigate disruption and change their operating models to be more resilient.

1. Speed is the new efficiency
   We are moving to an age where models, systems and tools dynamically adapt to market pressures and opportunities. This transformation is driven by technology enabled acceleration.

2. The intelligent enterprise is powered by the new tech stack
   Cloud technology is a priority for 46% of organizations, while cyber-security is top of mind for 50% of CEOs. AI, Automation, data analytics, IoT and robotics are key drivers of the future tech stack.

3. Disruption is driving a flight to trust
   In a world of disruptive progress, consumers and businesses are making choices based on trust. Systems and data need to be secure, reliable and resilient.

4. Talent is now everywhere
   We now operate with a highly distributed and remote workforce. This boundaryless model requires a new approach to technology, security, process and people management.
