

WINGS

Reimagine the Future of Your Enterprise Operations

Imagine your IT and business operations as a living ecosystem. One that learns, adapts, and evolves with every challenge – a shortage of skilled talent to bridge the old and the new. And, as business grows, so does the complexity across IT, finance, HR, supply chain, and customer service.

These challenges often lead to siloed operations, mounting costs, and a reactive approach to problems. The result? Teams spend more time firefighting than innovating.

WINGS is created for this reality!

A platform where AI agents work quietly in the background, learning, thinking, and collaborating with your teams. They automate routine tasks, resolve incidents before they escalate, and help connect information across different business & support functions. Over time, **WINGS** helps your business shift from reactive support to proactive, self-improving operations.

The outcomes:

 **Up to 40%* Greater Operational Efficiency**

Agentic AI, process automation, and task elimination streamline your operations

 **Reduce Costs by Up to 50%***

Real-time analytics and AI-assisted support drive significant savings

 **Accelerate Innovation & User Experience by 60%***

Industry-first AI assist and advisory capabilities for all users.

*Based on preliminary results from lab experiments for steady-state use of AI agents in IT operations.

Learn how **WINGS**, our AI-powered delivery platform for Operations under **Wipro Intelligence™** turns business complexities into a competitive advantage.
