

Wipro's General Data Protection Regulation (GDPR) Framework

Powered by Informatica data management and AWS Cloud

Wipro's General Data Protection Regulation (GDPR) framework has been derived from best practice frameworks. The framework compartmentalizes privacy compliance into 4 dimensions. The 4 dimensions jointly contain 27 work streams.

The dimensions are non-linear and can be considered as activities that occur concurrently. All the 27 work streams need to be considered to achieve a successful outcome of GDPR compliance.

Compliance underpinned by technology and intelligence

Discover – discover personal data acquired through different sources throughout your data ecosystem

Manage – define, manage and implement an integrated strategy considering governance and operational components to achieve GDPR compliance

Protect – protect personal data against adversaries, misuse or information hoarding

Report – data breaches reported within 72 hours of its occurrence with local regulators

Approach dimensions and work streams framework

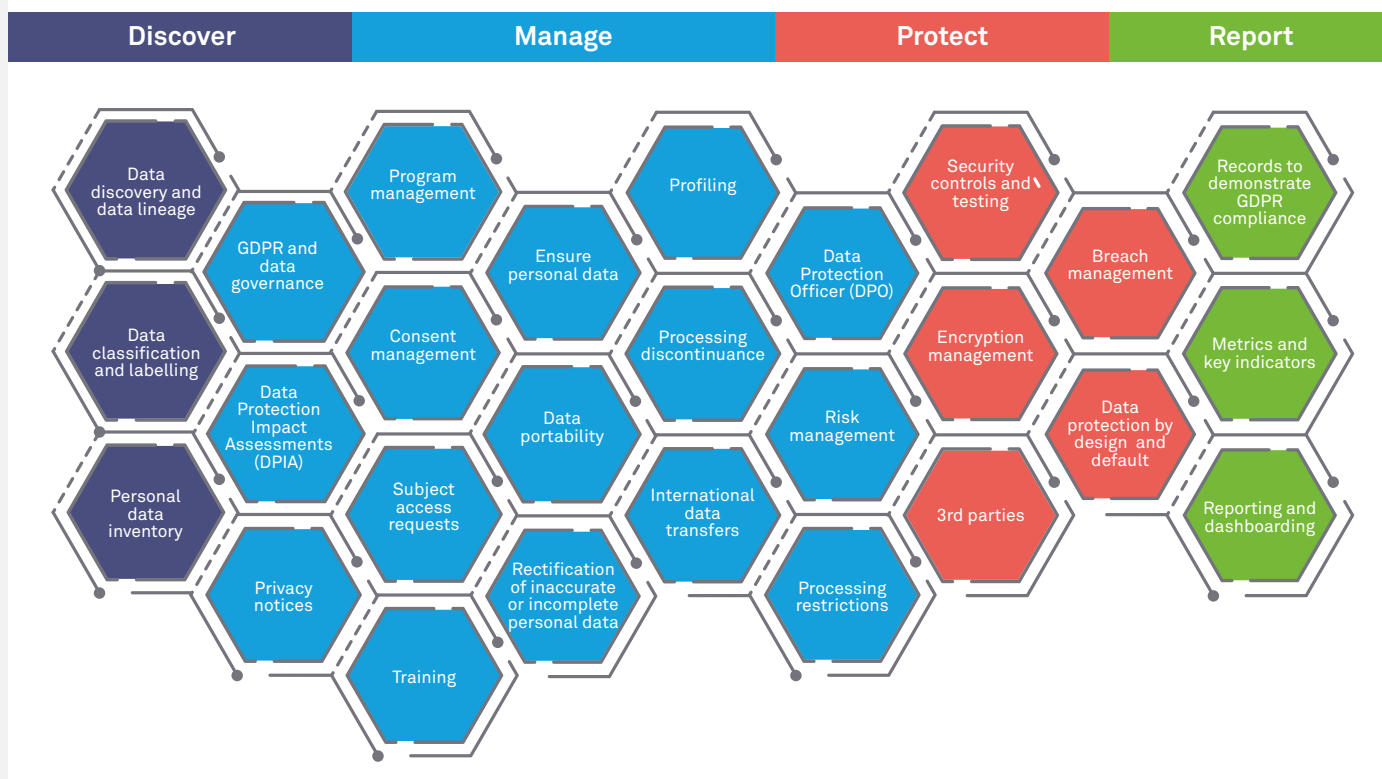

Figure 1: Framework powered by Informatica's data governance and compliance products and hosted on AWS platform

The framework is powered by Informatica's data governance and compliance products for GDPR. These are an integrated set of innovative, intelligent products that are recognized leaders in their respective spaces of data governance, data discovery, data masking, data remediation, data archiving and data consent management.

The solution is hosted on the AWS platform leveraging the AWS's industry-leading GDPR-compliant offerings.

Value proposition: As-a-Service model

- Complete ownership – One-stop-shop for GDPR compliance services, tools and platform
- Pay as you go – GDPR-compliance as a service model; data catalogue-based solution delivery
- Price bundling – favorable overall pricing for services, tools and platform
- Rapid go-to-market – pre-built solutions with software platform
