Data on Cloud

Wipro's partnership with Snowflake enable enterprise leaders to unlock the power of data by enabling faster performance, elimination of duplicate data, scalability, higher value-added tasks focus, improved visibility and responsiveness, and faster time to insights.

A Snapshot of our Global Reach

Wipro led the world's largest Snowflake data transformation

Created a first of its kind modern data platform on AWS and Snowflake by partnering and contributing to the accelerator build, architecture, and end-2-end program execution with an objective of 11 PB of data migration from on-premise to cloud, leading to 70% Less licensing and support effort and 20% less TCO. This also enabled business to improve upon their query/user concurrency issues, enabled near real time analytics and decision making, and addressed data availability delays

Our Service Offerings

- **Consulting and Strategy**
- **Data Modernization and Transformation**
- **Architecture and Roadmap**
- **Rehost, Refactor, Redesign**
- **Operate - Smart Monitoring and Optimization**
- **Wipro FullStride Data Platform**

Accelerators

Wipro FullStride Data Platform

Wipro's FullStride Data Platform is a one-stop automated cloud migration solution designed to unlock the power of data insights to drive business growth and value. It's innovative suite of accelerators and ready-to-deploy modules allow enterprises to develop an effective plan for migrating legacy applications and data, as well as prioritize their cloud investment. Powered by AI/ML, this platform brings together Wipro's leading cloud and data expertise to modernize data operations

SnowPro

Wipro's SnowPro ensures end to end automatic conversion of SQLs into Snowflake Queries resulting in approximately 70% savings in SQL Conversion Effort

CDRS

Wipro's CDRS is an automated End to End DB migration accelerator that can be used to migrate Data to Snowflake along with data reconciliation routines leading to average 50% Productivity gains in migration effort. This will enable faster history data availability for Business

RepoCHK

Wipro's RepoCHK tool automates the data level validation of Reports before & after re-pointing to Snowflake DB leading to 46% productivity gains in overall Report data validation effort. This will help businesses expedite their report modernization/migration timelines translating to early business value realization

SNIFE

AI Powered Report Rationalization and BI Platform Modernization tool which simplifies the BI landscape, establishes BI governance, and helps reduce Tool and Report proliferation. It's a metadata focused Business Intelligence transformation toolkit and helps in automatic DB connection changes/switches for repointing use cases. This will help business expedite their report modernization/migration timelines translating to early business value realization
