

Wipro's SAP Intelligent Asset Management (IAM) Expertise: Delivering Comprehensive Implementations That Enhance Business Operations

Infuse Intelligence into the
Asset Supply Chain with a Wipro-led
SAP Solution

For enterprises with extensive asset-maintenance tasks, adopting a standardized, streamlined asset management platform is indispensable to ensuring that business operations function as expected. Wipro's expertise in SAP's cloud-based Intelligent Asset Management (IAM) solutions addresses these needs, allowing enterprises to develop their digital maturity and unlock new strategies for optimizing the full range of their business assets. A Wipro-led IAM implementation provides accurate maintenance assessments based on SAP's predictive intelligence tools, resulting in stronger collaboration among teams and greater asset dependability and health.

Our preconfigured end-to-end system featuring our built-in proprietary solution can be integrated with backend SAP ERP EAM systems to accelerate project SAP IAM implementations.

Key takeaways

-  Extended and improved asset life and reliability powered by intelligent processes.
-  Reduced total cost of ownership (TCO) and faster time to value with increased innovation speed.
-  Enterprise digital maturity aligned with business growth plans.
-  Improved workforce productivity and reduced workforce dependency.
-  Compliance with industry-specific regulations.

Key benefits

 **Maintenance cost reductions by up to 20%:** Go from a reactive to a proactive maintenance approach in which operational efficiencies increase, productivity is improved, and human dependency is reduced, resulting in lowered maintenance expenses and TCO.

 **A single asset collaboration platform:** Increase teamwork through integrated visibility of multiple assets' performance.

 **Real-time decision making:** Easily plan for upgrades by predicting asset failures based on continuous learning AI/ML tools that deliver immediate results.

 **Equipment reliability:** Monitor and predict asset behavior and predict equipment reliability with digital twins.

 **Environment, health, and safety (EHS) improvements:** Gain real-time insights on workplace environments to detect hazards, manage safety equipment usage, increase behavioural safety, reduce accidents, and eliminate geo-fencing breaches that initiate corrective actions.

Features

 A centralized, intelligent asset repository, integrated and synchronized with SAP ERP EAM.

 A connected asset network, reducing master data maintenance and improving data reliability.

 Holistic maintenance strategies and analyses of asset performance for potential improvements.

 IoT-enabled predictive maintenance and asset insights.

 A pilot program offering enabling clients to “feel” the product and its suitability for their business and asset maintenance processes.

Our industry cloud solutions developed on SAP Business Technology Platform (BTP) and integrated within IAM deliver additional benefits for our clients, enabling agile and continuous innovations.
