

Wipro Digital Experience Platform

Cognitive Content Automation, a key offering in the Wipro Digital Experience Platform, leverages principles of Artificial Intelligence, Pattern Recognition, Natural Language Processing and Machine Learning to perform information extraction and classification across the document, ultimately digitizing, automating and simplifying the complex document management processes.

Drive efficiencies and competitive advantage with cognitive document process automation

Processes input file types from any network drive, emails, Enterprise Content Management platforms, etc.

Processes all document formats such as PDFs (digital, scanned), images, text and word files

Performs unsupervised or supervised document classification and creates separate clusters or groups as applicable

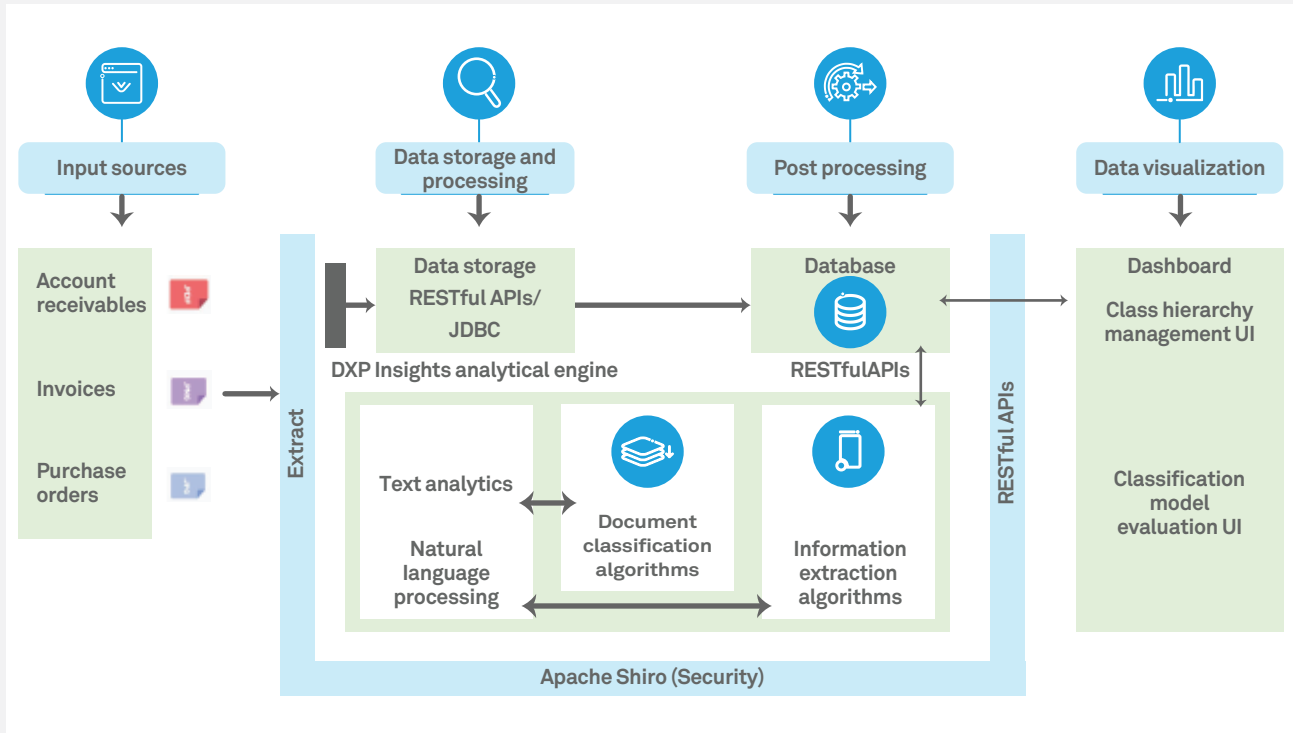

Identifies and extracts key information from business documents (multi-variant formats), irrespective of the location

Continuous and automatic processing of documents for immediate data extraction, with details on extraction accuracy and confidence level

Automated classification and information extraction of data for reduced costs and enhanced accuracy

Solution overview

Key benefits

- Streamlined and efficient document processing, leading to lower cost of operations
- Increased reusability across units and department with Full Time Employee (FTE) capacity release
- Advanced process automation leading to enhanced accuracy
- Scalability to handle large volumes of documents with multi-variant formats
