A woman with brown hair, wearing a black and white striped shirt, is smiling and looking at a laptop screen. The background is a bright, out-of-focus office setting with large windows.

Digital Navigator Assessment (DNA) for Supply Chain Management (SCM)

Rapid COVID-19 risk identification, response framework & nerve center

The COVID-19 pandemic has forced many companies to rethink their global supply chain models and respond to the crisis environment and impact. **Wipro's DNA for SCM** is an accelerated assessment framework that helps customers identify high risk areas and impact of COVID-19 on critical business applications and IT services.

A light blue circle is positioned to the left of the text.

Enable agility in your supply chain by redefining business processes

Key takeaways

Provides a list of near-term actions needed to respond to the immediate COVID-19 challenge

Identifies quick wins and faster ways to implement Oracle SCM Cloud solutions

Identifies and recommends near and medium-term plans and initiatives; with tangible benefits and milestones

Key benefits

DNA for SCM identifies impact of COVID-19 to help define remediation strategies and execution plan:

Identifies impact on current ERP applications landscape

Evaluates options and defines plans for remediation & execution – by leveraging current set of applications or alternate new solutions

Business change impact:

- Financial ROI, budget
- Organizational process changes, KPIs and benchmarking for the new normal

Strategy & advisory:

- Business process strategy aligned to the emerging business case
- Advisory: High-level solution architecture

Features

DNA offers a series of interactive 1-4-day sessions to identify:

Risk profile: High risk areas in your supply chain that may impact your business

Mitigation plan: Key decision points for consideration amidst and post Covid-19

Response action plan: Potential remedial actions

Deliverables:

DNA for SCM will chart out an immediate and near-term plan

Applications / technology roadmap to put the plan into operation

Accelerated assessment framework to identify impact of COVID-19 on business, critical ERP applications and IT services
