# Wipro's Integrated Threat Management

Integrated Threat Management Solution (ITM) at Wipro helps organizations build measureable, effective detection and remediation actions to stay secure; get proactive and contextualized threat intelligence and eliminate detection blind spots, with machine learning solution; and automate the response playbooks using the ITM Solution.

Get a holistic view across threats and corresponding responses using Wipro's Integrated Threat Management Solution

Build and evolve maturity of incident response teams, independent of competency and people skillset, and ensure institutional memory of incident response stays within the organization

Evidence retention of every incident that is legally admissible and availability of full documentation of the incident

Real time monitoring of the internet and e-channels for the surface web, deep web and dark web to detect a variety of targeted threats

The solution drastically reduces the attacker's window of opportunity by shrinking the 'mean time to detection' and 'mean time to resolution' of a cyber-security incident.

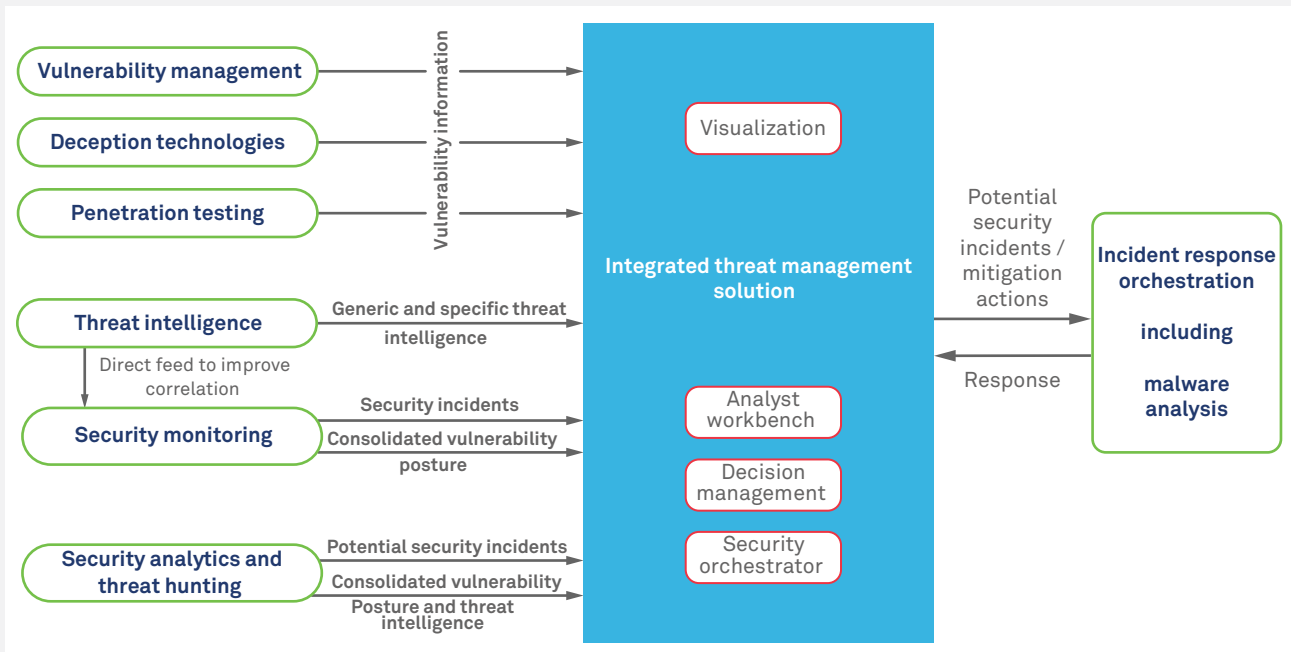

Figure 1: Indicative architecture of the solution

Key benefits

- Reduce mean time to detection and mean time to remediation

- Save analyst time on false positives and reduce alert fatigue

- Automated response to reduce human error

- Reliable execution of runbook and incident management

- Significant reduction in false positive

- Assess control effectiveness - assess how actionable intelligence can be leveraged to evaluate effectiveness of deployed security technologies

- Enhanced detection capabilities - be notified in a timely fashion about potential and imminent cyber threats specifically targeting customer organizations

- Effective protection measures - protect your brand from actionable intelligence to effectively respond to targeted threats

Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO) is a leading global information technology, consulting and business process services company. We harness the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help our clients adapt to the digital world and make them successful. A company recognized globally for its comprehensive portfolio of services, strong commitment to sustainability and good corporate citizenship, we have over 160,000 dedicated employees serving clients across six continents. Together, we discover ideas and connect the dots to build a better and a bold new future.
