

The background of the top half of the page is a photograph of a man and a woman in business attire sitting at a desk, looking at a laptop. The man is on the left, wearing glasses and a white shirt with a tie. The woman is on the right, wearing a white shirt and a dark blazer. A large blue circle with a gradient is overlaid on the left side of the image, containing the title text.

## Wipro's Manufacturing IQ (MIQ) – Margin Manager Solution

### Introduction

Manufacturing IQ (MIQ) is a philosophy consisting of smart applications that help in drawing insights and providing instant access and control of critical operating parameters on all aspects of operations including new product introduction, production, quality, maintenance, and supply chain. MIQ is a platform agnostic, Cloud based suite of manufacturing intelligence applications. It provides holistic, contextual and actionable insights by bringing together information from manufacturing processes and systems.

**The Margin Manager solution allows plant heads to make proactive decisions and take necessary actions quickly**

### Key highlights

Enables confident data-driven decision making in near real-time through persona-driven focused apps.

Proactively provides relevant business and operational insights to key end-users in a format that they understand and can act upon.

Fosters collaboration across plants, departments, functions and the manufacturing ecosystem.

## Solution features

The Margin Manager solution provides a near real time 'dollarization of the process' by leveraging the powerful SAP HANA platform.

With decentralized edge analytics, the solution provides real-time dynamic performance measures at production unit level

Figure 1: Manufacturing operational excellence: Industry 4.0 State with Wipro's MIQ series

## Business benefits

With decentralized edge analytics, the solution provides real-time dynamic performance measures at production unit level.

Opportunity for informed decision-making and aligning manufacturing strategy and accounting systems.

Unit-level performance metrics aggregated at station and plant level for financial cost, productivity and quality provide business information in real time.

Represents the lowest level of detail for profitability management.
