

Wipro's Network deployment Suite

The unprecedented growth in adoption of wireless services has resulted in demand for ubiquitous connectivity. While catering to the growing demand, service providers are trying to optimize capex

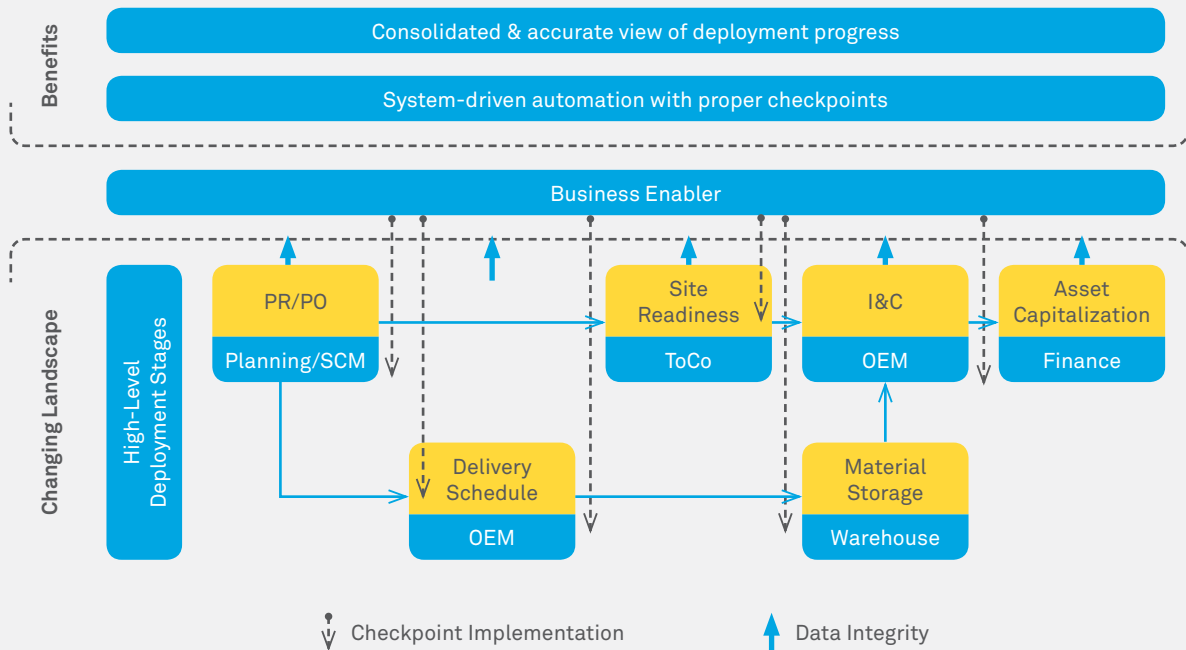

and opex spend on network deployment. Wipro's comprehensive suite of standardized processes and workflow-based tools help operators roll out, upgrade and decommission wireless networks, thereby supporting visibility and automation and controlling the complete deployment cycle.

NDS is based on real-life experiences from global deployments

Key takeaways

- Easy workflow-based platform configuration that interfaces with existing platforms
- SaaS-based flexible deployment on Cloud supporting all network types
- Reduces network deployment costs by 20 to 30%

Highly scalable and customizable solution for your business needs

Solution overview

Key features

- Check points to ensure adherence and visibility across stakeholders
- Geo-tagged site images to verify and authenticate deployment progress
- Mobile client-based application for increased portability and site testing
- Business rules and SLA-based work assignment to optimize assigned tasks
- Easy integration with external systems for vendor, asset, order and inventory management

Key benefits

- Real-time information flow and coordination amongst all stakeholders
- Customizable role-based view of deployment status
- Up to **40%** faster time to activation and decommissioning of network
- **100%** site audit and acceptance testing status
