

SAP automation services powered by Wipro HOLMES™ AI platform

Certified by SAP to automate and
interoperate with the SAP S/4
HANA and SAP ERP systems

Wipro's SAP automation platform, built on our Wipro HOLMES platform can help.

Wipro's SAP automation offering is a matured product that provides a measurable "Value Index" for each level of the business process. Our SAP automation BOTs are closely integrated with Wipro's AI platform Wipro HOLMES, and have an efficient CHAT interfacing capability, Avaamo, to provide end-to-end automation capabilities across live insights, predictive analytics, business process optimization and new business models.

The chat interface of the solution has been powered by technology from Avaamo, a niche technology startup offering an AI-driven enterprise BOT platform. Avaamo's conversational

- How can you provide enhanced service to your business users?
- How can you reduce the cost of running your SAP application?
- Do some of your users struggle while using multiple systems for their daily tasks?
- Do your business processes get interrupted due to issues between systems?

AI platform goes beyond simplistic commands and uses deep vertical AI to create rich multi-turn conversational dialogue with customers.

Fig. 1: Avaamo's conversational AI platform

Our SAP automation platform can be deployed with minimal effort and in a short period of time. The solution is closely aligned with the SAP product upgrade strategy, making the automation assets future proof. The solution provides capability capabilities across three categories:

- Business processes
- Administration
- Technology

They are modular in nature and customers can prioritize deployment to improve productivity in areas which are relevant for them
