# Wipro Cybersecurity and Risk Services

Enabling your transformation into  
a cyber-resilient business

For organizations across all industries, cybersecurity has become essential in today's increasingly digitized world. The frequency and impact of cyber-attacks have grown significantly in recent years, and paired with the shift towards remote working, cyber resilience has become a social imperative as well as a business goal. Cybersecurity initiatives can help to build customer trust and increase profitability, but organizations often struggle to communicate the benefits to the board and showcase the value and affordability of their investment.

Many obstacles stand in the way of a cybersecure future. Modern digital channels and cloud adoption open new opportunities for growth, yet present greater risks as attack surfaces continue to expand. Businesses are now deploying new products and services much faster, and the increased pace of innovation has meant that systems quickly become outdated. In a constantly evolving cybersecurity

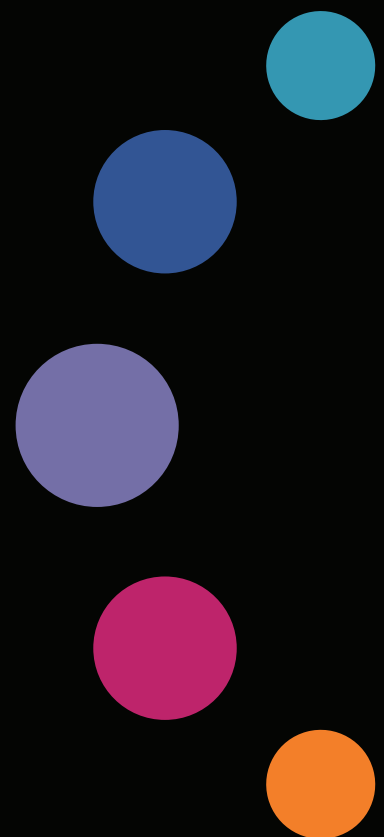

landscape, organizations must do more to defend themselves against new threats. An adept security workforce is required, but a lack of skilled security expertise in the market makes it hard to attract and retain the top talent. Support is needed to develop the right cyber capabilities in a cost-effective way that enables sustained business value.

The regulatory and compliance environment also poses a significant challenge to modern businesses. Rising standards and constant shifts in the landscape increase the complexity of compliance and can be burdensome due to the human effort and cost necessary to manage the risk.

In the business of the future, proven cyber resilience will drive long-term growth. Success relies on instilling a cybersecurity mindset within the entire organization and understanding where to concentrate resources to enable the business and protect against the greatest threats.

56% of B2B and B2C customers are expressing frequent interest in the cybersecurity posture of organizations they do business with.

# The solution

As a trusted advisor, we draw from a wealth of cross-industry experience and deep security expertise to deliver targeted solutions across the end-to-end cybersecurity lifecycle, from strategy and implementation to managed services.

We drive secure digital transformation efforts, built upon our unique alliances and partnerships across the cybersecurity ecosystem. Our solutions enhance the risk posture of organizations and protect against cyber risks, ensuring sustained long-term business growth.

## A comprehensive cybersecurity offering

Powering your transformation into a secure, future-ready business.

### Strategy and Risk

Enabling organizations to assess and enhance their cybersecurity risk posture.

#### Business outcomes:

- Increased brand protection and consumer trust
- Enhanced risk visibility and improved governance
- Compliance with tightening regulations

### Cloud Security

Defending businesses against advanced cyber threats on-premises and on cloud.

#### Business outcomes:

- Quicker and secure onboarding on to cloud
- Holistic cloud risk visibility and reduced attack surface
- Secure business growth

### Digital Identity

Securing digital transformation through next-gen identity and access services.

#### Business outcomes:

- Personalized, any time, anywhere and secure user experiences
- Enhanced compliance with improved productivity
- Zero Trust and Identity as-a-service adoption

### Application and Data Security

Helping organizations to better understand and respond to application and API threats.

#### Business outcomes:

- Improved security and risk posture
- Real-time identification and mitigation of platform risks
- Discovery, identification and end-to-end protection for data at rest, in motion and in use

### Security Intelligence and Analytics

Combatting against cyber threats through Managed Detection and Response services.

#### Business outcomes:

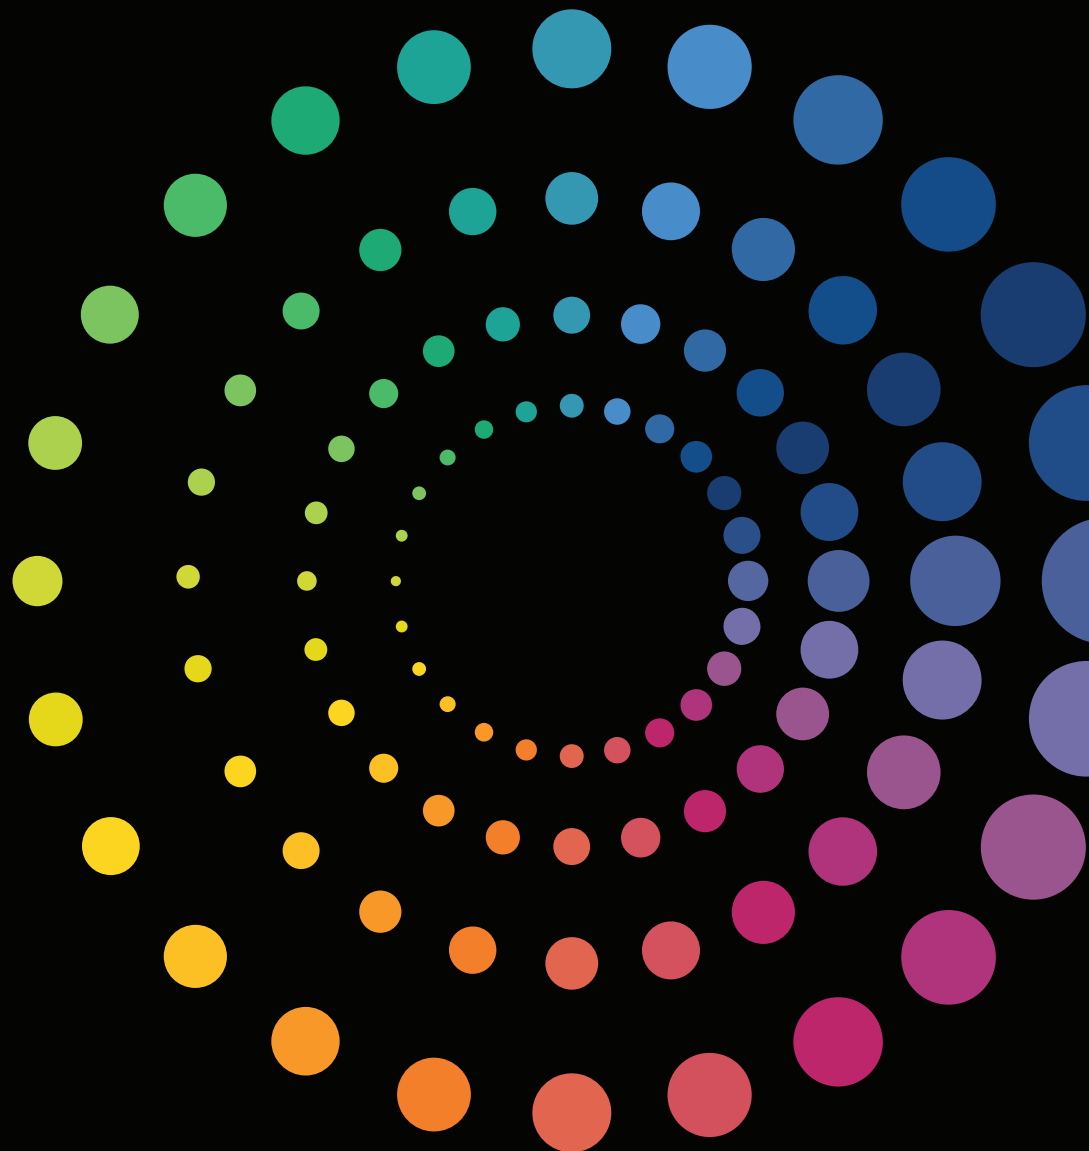

- Reduced risk and impact against emerging threats
- Visibility to enterprise-wide threat posture
- Rapid response and remediation

# Why Wipro?

**Our consulting capabilities and strategic thinking enable us to transform organizations into secure, modern digital businesses.**

We are recognized as leaders for our work in ensuring secure digital transformation and business growth. Our cybersecurity offering is automation-led and platform-driven, tailored for industry use and delivered “as a service”.

With over 9,000 CyberSecurists and more than 20 global delivery centers, we are one of the select few providers with offerings that map end-to-end to industry frameworks. Our comprehensive suite of partnerships, acquisitions and venture investments empowers us to defend organizations against modern-day cyber risks.

**Ambitions Realized.**
