

# Wipro Cloud Application and Risk Governance (CARG) Solution

Secure your business applications before, during and after migration to Google Cloud

Enterprises are accelerating business growth by moving business-critical applications and workloads to Google Cloud Platform. Improved security, visibility and hygiene status assessments across Google Cloud's services are among the most requested governance capabilities by enterprises.

Wipro CARG solution provides a single-pane-of-glass view across multiple Google Cloud accounts. It oversees Google Cloud's services to give enterprise managers meaningful and up-to-date visibility into their asset inventory. It also applies Google Cloud and Wipro security best practices to provide a consolidated compliance picture of business applications within their associated Google Cloud services. These capabilities also help enterprises fast track the migration of business applications to Google Cloud.

---

## Solution Overview

Wipro FullStride Cloud Services combines industry-leading business solutions, like Google Cloud, with a high-touch, business outcome based approach to help you maximize the true transformative potential of the cloud. The Wipro CARG solution applies a structured approach to application migration by conducting a rigorous risk assessment. It uses the results to recommend the set of base security controls needed to protect an application on the GCP based on a variety

of parameters, including regulatory and compliance considerations.

The solution continuously monitors controls based on Google Cloud and Wipro FullStride Cloud Services security best practices. It also provides a dynamic risk and compliance view of your business applications and associated underlying Google Cloud services.

# Wipro CARG Solution Features

Application risk profiling that leads to a Cloud/No Cloud recommendation is based on

Business Risks

Data Risks

Regional Restrictions

Regulatory, Standards and Compliance Needs

## Controls, gap assessment and assurance capabilities

Based on Wipro Common Cloud Control Framework (C3F)

Automated recommendations of base security controls

Controls recommendations based on regulatory and compliance requirements
