

# IBM AIX Modernization and Migration

Modernize the AIX Enterprise Power Infrastructure with Cloud Flexibility

## Introduction

Wipro's Legacy Modernization service enables IBM Power Systems customers that have typically relied upon on-premises to extend their Power IT resources to IBM Power Systems Virtual Servers automatically and economically to avoid large capital expense or added risk when migrating customers' essential workloads.

## Key Takeaways

-  Clients can take advantage of the superior performance with scalable and resilient system technology
-  Simplify hybrid multi-cloud with greater agility and flexibility by delivering a similar IT architecture
-  Wipro's integration tool to automate deployment, migration and provisioning of workloads just-in-time based on blueprints, best practices and certified architectures

Accelerate the journey with hybrid integration of existing on-premises IBM Power System workloads to IBM Power Systems Virtual Servers
