

A photograph of two construction workers in safety gear (hard hats and high-visibility vests) looking at a tablet together on a construction site. The worker on the left is wearing a yellow hard hat and a blue and white striped shirt under a yellow vest. The worker on the right is wearing a blue hard hat and a blue shirt under a yellow vest. They are both smiling and looking at the tablet held by the worker on the right. The background is a blurred construction site with scaffolding and structural elements.

Wipro's Digital Inspection Solution

Enabling mobile workforce through digital inspection

Wipro's Digital Inspection solution is a simple to use, powerful and flexible solution for enterprises. The solution combines the robust functionality to schedule, track and manage any type of inspection with a simple end-user application to allow for easy completion of inspections on any mobile device or any browser.

The tool's flexibility allows it to be customized as per the application

Key takeaways

Flexibility in question/answers sets, plus fully configurable scoring and compliance thresholds

Integrated with core platform data for people, space, assets, locations, etc.

Flexible assignment, scheduling and end-to-end tracking through workflow routing, approvals and notifications

Simple and easy-to-use mobile app built on top of IBM® TRIRIGA®

Solution

Mobile Inspection

- Mobile inspection in tablet or mobile view - supports offline mode
- Inspector dashboard to easily access all inspection tasks
- Camera enabled for observations and comments
- Simple, efficient UX for on the go inspectors
- Rich features allowing flexibility in conducting inspections and addressing issues on-site

Inspection plans & tasks

- One-time or recurring inspections
- Accommodates executive, manager and inspector roles
- Flexible checklist/questions/answer sets
- Full lifecycle from inspection setup to closure

Flexibility & configurability

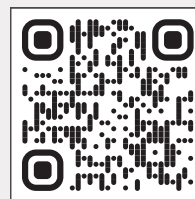

- Flexible scoring model allowing for customer definition of compliance and quality thresholds
- Able to quickly upload third party or custom checklists and questions
- Can be integrated with capital planning, projects, space, and RE data sets within single repository of IWMS platform

Real-time tracking and reporting

- Flexibility to report on inspections results as well as Inspector performance
- Single repository for inspection results integrated with IWMS data enables more powerful downstream analytics and better decision making
- Data and analytics enable further corrective actions due to seamless integration with CMMS features

Key benefits

- Configurable for most use cases in EHS, general inspections, safety inspections, compliance, facility condition assessment, and punch lists that can be fed into the corporate planning processes.
- Reduce risk, lower costs and increase workplace safety by streamlining the identification of quality, operational and process issues that can lead to non-compliance.
- Initiate service requests from the app to address deficiencies preventing further damage or future harm to employees.
- Single source of truth (with consistent data) around checklists/questions diminishes reliance on local experts, reducing time and cost while increasing compliance across entire portfolio.
