WIPRO CYPRUS PRIVATE LIMITED
NOTES TO THE FINANCIAL STATEMENTS
(Amount in Rupees, except share and per share data, unless otherwise stated)

1. Company overview

Wipro Cyprus Private Limited (“the Company”) is a fully owned subsidiary of Wipro Limited. The Company was incorporated on 27th April 2006 to act as an investment company holding investments in Europe. The functional currency of the Company is INR. These financial statements have been prepared and audited to attach with the accounts of the holding company, to comply with the provisions of Indian Companies Act, 2013.

2. Significant accounting policies

a. Basis of preparation of financial statements

The financial statements are prepared in accordance with Generally Accepted Accounting Principles in India (GAAP) under the historical cost convention on the accrual basis, except for certain financial instruments which are measured on a fair value basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of Act (to the extent notified and applicable), Accounting Standards (‘AS’) issued by Institute of Chartered Accountants of India (ICAI) and other generally accepted accounting principles in India.

b. Use of estimates

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities and the disclosure of contingent liabilities as at the date of financial statements and reported amounts of income and expenses during the year. Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates is recognised in the year in which the estimates are revised and in any future year affected.

c. Foreign currency transactions

The Company is exposed to currency fluctuations on foreign currency transactions. Foreign currency transactions are accounted in the books of account at the exchange rates prevailing on the date of transaction.

Foreign currency transaction

The difference between the rate at which foreign currency transactions are accounted and the rate at which they are realized is recognized in the statement of profit and loss.

Translation of financial statements

The Company is a foreign subsidiary of Wipro Limited and has been treated as a integral operating unit for translation. For the purpose of accounts during the period, all income and expenses items are converted at the average rate of exchange applicable for the period. All assets and liabilities are translated at the closing rate on the balance sheet date. The equity share capital, reserves and investment in subsidiaries are carried forward at the rate of exchange prevailing on the transaction date. All resulting exchange difference arising out of year-end conversion has been transferred to Translation Reserve in Reserve and Surplus.

d. Revenue recognition

Services:

The company recognizes revenue when significant terms of the arrangement are enforceable, services have been delivered and the collectability is reasonably assured. The method of recognizing the revenues and

costs depend on the nature of the services rendered:

A. Time and material contracts

Revenues and costs relating to time and material contracts are recognized as the related services are rendered.

B. Fixed-price contracts

Revenues from fixed-price contracts, including systems development and integration contracts are recognized using the "percentage-of-completion" method. Percentage of completion is determined based on project costs incurred to date as a percentage of total estimated project costs required to complete the project. When total cost estimated exceed revenues in an arrangement, the estimated losses are recognized in the statement of profit and loss in the period in which such losses become probable based on the current contract estimates.

'Unbilled revenues' included in other current assets represent cost and earnings in excess of billings as at the balance sheet date. 'Unearned revenues' included in other current liabilities represent billing in excess of revenue recognized.

Revenue from customer training, support and other services is recognized as the related services are performed.

Revenue from the sale of user licenses for software applications is recognized on transfer of the title in the user license.

C. Maintenance Contracts

Revenue from maintenance contracts is recognized ratably over the period of the contract using the percentage of completion method. When services are performed through an indefinite number of repetitive acts over a specified period of time, revenue is recognized on a straight-line basis over the specified period unless some other method better represents the stage of completion.

In certain projects, a fixed quantum of services or output units is agreed at a fixed price for a fixed term. in such contracts, revenue is recognized with respect to actual output achieved till date as a percentage of total contractual output. Any residual services utilized by the customer is recognized as revenue on completion of the terms.

Products:

Revenue from sale of products is recognized when the significant risks and rewards of ownership has been transferred in accordance with the sale contract. Revenue from product sales is shown gross of excise duty and net of sales tax separately charged and applicable discounts.

Other income

Agency commission is accrued when shipment of consignment is dispatched by the principal.

Interest is recognized using the time proportion method, based on the rates implicit in the transaction.

Dividend income is recognized when the company's right to receive dividend is established.

e. Investments

Long term investments are stated at cost less other than temporary diminution in the value of such investments, if any. Current investments are valued at lower of cost and fair value determined by category of investment. The fair value is determined using quoted market price/market observable information

adjusted for cost of disposal. On disposal of the investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

f. Income tax

The current charge for income taxes is calculated in accordance with the relevant tax regulations. Deferred tax assets and liabilities are recognised for the future tax consequences attributable to timing differences that result between the profit offered for income taxes and the profit as per the financial statements by each entity in the Company.

Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The effect on deferred tax assets and liabilities of a change in tax rates is recognised in the period that includes the enactment/ substantial enactment date.

Deferred tax assets on timing differences are recognised only if there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. However, deferred tax assets on the timing differences when unabsorbed depreciation and losses carried forward exist, are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised.

Deferred tax assets are reassessed for the appropriateness of their respective carrying amounts at each balance sheet date.

g. Earnings per share

The number of shares used in computing basic earning per share is the weighted average number of shares outstanding during the year.

The number of shares used in computing diluted earnings per share comprises the weighted average shares considered for deriving basic earnings per share, and also the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. The number of shares and potentially dilutive equity shares are adjusted for any stock splits and bonus shares issued.

h. Cash flow statement

Cash flows are reported using indirect method, whereby net profits before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated.

i. Provisions and contingent liabilities

The Company creates a provision when there is a present obligation as a result of past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognized when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event, based on a reliable estimate of such obligation.

Note 3 Share Capital

(i) The details of share capital are given below:-

Authorised capital

200,000 (2014: 200,000) Equity shares of Euro 1 each
