**NOTES TO THE FINANCIAL STATEMENTS**  
**(Amount in Rs. except share and per share data, unless otherwise stated)**

**1. Company Overview**

Healthplan Holdings Inc. is a subsidiary of HPH Holdings Corp., incorporated and domiciled in USA. The Company is provider of IT Services, including Business Process Services (BPS) services, globally and IT Products. The functional currency of the Company is USD and the reporting currency for these financial statements is INR. These financial statements have been prepared and audited to attach with the accounts of the holding company, to comply with the provisions of the Companies Act, 2013.

**2. Significant accounting policies**

**(i) Basis of preparation of financial statements**

The financial statements are prepared in accordance with Generally Accepted Accounting Principles in India (GAAP) under the historical cost convention on the accrual basis, except for certain financial instruments which are measured on a fair value basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 ('Act') read with Rule 7 of the Companies (Accounts) Rules, 2014, and the relevant provisions of the Companies Act, 2013 ("the 2013 Act") / Companies Act, 1956 ("the 1956 Act"), as applicable, Accounting Standards ('AS') issued by Institute of Chartered Accountants of India (ICAI) and other generally accepted accounting principles in India.

**(ii) Use of estimates**

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities and the disclosure of contingent liabilities as at the date of financial statements and reported amounts of income and expenses during the year. Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates is recognized in the year in which the estimates are revised and in any future year affected.

**(iii) Fixed Asset**

Tangible assets are stated at historical cost less accumulated depreciation and impairment loss, if any. Costs include expenditure directly attributable to the acquisition of the asset. Borrowing costs directly attributable to the construction or production of qualifying assets are capitalized as part of the cost

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Subsequent expenditure relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably

Intangible assets are stated at the consideration paid for acquisition less accumulated amortization and impairment loss, if any.

Cost of fixed assets not ready for use before the balance sheet date is disclosed as capital work-in-progress. Advances paid towards the acquisition of fixed assets outstanding as of each balance sheet date is disclosed under long term loans and advances

**(iv) Provisions and contingent liabilities**

Provisions are recognized when the Company has a present obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of obligation.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

#### **(v) Foreign currency transactions**

The Company is exposed to currency fluctuations on foreign currency transactions. Foreign currency transactions are accounted in the books of account at the exchange rates prevailing on the date of transaction.

##### **Transaction:**

The difference between the rate at which foreign currency transactions are accounted and the rate at which they are realized is recognized in the statement of profit and loss.

##### **Translation:**

Monetary foreign currency assets and liabilities at period-end are translated at the exchange rate prevailing at the date of Balance Sheet. The difference arising from the translation is recognized in the statement of profit and loss, except for the exchange difference arising on monetary items that qualify as hedging instruments in a cash flow hedge or hedge of a net investment in a non-integral foreign operation. In such cases the exchange difference is initially recognized in hedging reserve or Foreign Currency Translation Reserve (FCTR), respectively. Such exchange differences are subsequently recognized in the statement of profit and loss on occurrence of the underlying hedged transaction or on disposal of the investment, respectively. Further, foreign currency differences arising from translation of intercompany receivables or payables relating to foreign operations, the settlement of which is neither planned nor likely in the foreseeable future, are considered to form part of net investment in foreign operation and are recognized in FCTR. When a foreign operation is disposed of, the relevant amount recognized in FCTR is transferred to the statement of profit and loss as part of the profit or loss on disposal.

The Company is a foreign subsidiary of HPH Holding Corp. and has been treated as a non-integral operating unit for translation. The assets and liabilities are translated at the exchange rate prevailing at the date of the balance sheet. The items in the statement of profit and loss are translated at the average exchange rate during the period. The differences arising out of the translation are transferred to foreign currency translation reserve.

#### **(vi) Depreciation and amortization**

The Company has provided for depreciation using straight line method over the useful life of the assets as prescribed under part C of Schedule II of the Companies Act, 2013 except in the case of following assets which are depreciated based on useful lives estimated by the Management:

Class of asset	Estimated useful life
Computer Software	6 years
Computer including telecom equipment and software (included under plant and machinery)	3 – 5 years
Furniture and fixtures	5 – 10 years

For the class of assets mentioned above, based on internal technical assessment the management believes that the useful lives as given above best represent the period over which management expects to use these assets. Hence the useful lives for these assets are different from the useful lives as prescribed under Part C of Schedule II of the Companies Act, 2013.

Freehold land is not depreciated.

Intangible assets are amortized over their estimated useful life on a straight line basis.

Payments for leasehold land are amortized over the period of lease.

Fixed assets individually costing Rupees five thousand or less are depreciated at 100% over a period of one year.

Assets under finance lease are amortized over their estimated useful life or the lease term, whichever is lower

## **(vii) Impairment of assets**

### **Financial assets:**

The Company assesses at each balance sheet date whether there is any objective evidence that a financial asset or group of financial assets is impaired. If any such indication exists, the Company estimates the amount of impairment loss. The amount of loss for receivables is measured as the difference between the assets carrying amount and undiscounted amount of future cash flows. Reduction, if any, is recognized in the statement of profit and loss. If at the balance sheet date there is any indication that a previously assessed impairment loss no longer exists, the recognized impairment loss is reversed, subject to maximum of initial carrying amount of the short-term receivable.

### **Other than financial assets:**

The Company assesses at each balance sheet date whether there is any indication that a non-financial asset including goodwill may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs to is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the statement of profit and loss. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost. In respect of goodwill, the impairment loss will be reversed only when it was caused by specific external events of an exceptional nature that is not expected to recur and their effects have been reversed by subsequent external events

## **(viii) Employee benefits**

### **Compensated absences:**

The employees of the Company are entitled to compensated absences. The employees can carry forward a portion of the unutilized accumulating compensated absences and utilize it in future periods or receive cash at retirement or termination of employment. The Company records an obligation for compensated absences in the period in which the employee renders the services that increases this entitlement. The Company measures the expected cost of compensated absences as the additional amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. Non-accumulating compensated absences are recognized in the period in which the absences occur. The Company recognizes actuarial gains and losses immediately in the statement of profit and loss account.

### **Pension and Social contribution:**

Pension and social contribution plan, a defined contribution scheme, the Company makes monthly contributions based on a specified percentage of each covered employee's salary.

## **(ix) Taxes**

### **Income tax:**

The current charge for income taxes is calculated in accordance with the relevant tax regulations.

### **Deferred tax:**

Deferred tax assets and liabilities are recognised for the future tax consequences attributable to timing differences that result between the profit offered for income taxes and the profit as per the financial statements of the Company.

Deferred taxes are recognised in respect of timing differences which originate during the tax holiday period but reverse after the tax holiday period. For this purpose, reversal of timing difference is determined using first in first out method.

Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The effect on deferred tax assets and liabilities of a change in tax rates is recognised in the period that includes the enactment/substantive enactment date.

Deferred tax assets on timing differences are recognised only if there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. However, deferred tax assets on the timing differences when unabsorbed depreciation and losses carried forward exist, are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets are reassessed for the appropriateness of their respective carrying amounts at each balance sheet date.

The Company offsets, on a year on year basis, the current and non-current tax assets and liabilities, where it has a legally enforceable right and where it intends to settle such assets and liabilities on a net basis.

#### **(x) Provisions and contingent liabilities**

Provisions are recognized when the Company has a present obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of obligation.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provision for onerous contracts is recognized when the expected benefits to be derived from the contract are lower than the unavoidable cost of meeting the future obligations under the contract.

#### **(xi) Earnings per share**

##### Basic:

The number of equity shares used in computing basic earnings per share is the weighted average number of shares outstanding during the year excluding equity shares held by controlled trusts.

##### Diluted:

The number of equity shares used in computing diluted earnings per share comprises the weighted average number of equity shares considered for deriving basic earnings per share, and also the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares.

Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. The number of equity shares and potentially dilutive equity shares are adjusted for any stock splits and bonus shares issued.

#### **(vi) Cash flow statement**

Cash flows are reported using the indirect method, whereby net profits before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, investing and financing activities of the Company are segregated.

## Notes to Balance Sheet

As at Mar 31,  
2016
