INDEPENDENT AUDITOR'S REPORT

To The Board of Directors of Wipro LLC Report on the Audit of the Special Purpose Financial Statements

Opinion

We have audited the accompanying special purpose financial statements of Wipro LLC ("the Company"), which comprise the Balance Sheet as at March 31, 2019, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and a summary of significant accounting policies and other explanatory information (herein after referred to as "the special purpose financial statements"). As explained in Note 2(i) to the Special Purpose Financial Statements, these Special Purpose Financial Statements include limited information and have been prepared by the Management of Wipro Limited ("the Parent") solely for inclusion in the annual report of Wipro limited for the year ended March 31, 2019 under the requirements of section 129(3) of the Companies Act, 2013, in accordance with the accounting policies of the Parent and in compliance with the recognition and measurement principles laid down in Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid special purpose financial statements give a true and fair view in conformity with the basis of preparation referred to in Note 2 (i) to the special purpose financial statements, of the state of affairs of the Company as at March 31, 2019, and its loss, total comprehensive income, its changes in equity and cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) issued by Institute of Chartered Accountants of India (ICAI). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Special Purpose Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the special purpose financial statements.

Basis of Accounting and Restriction on Use

Without modifying our opinion, we draw attention to Note 2(i) to the Special Purpose Financial Statements, on the basis of the preparation to the special purpose financial statements. The Special Purpose Financial Statements are prepared for inclusion in the annual report of the Ultimate Holding Company under the requirements of Section 129(3) of the Companies Act, 2013. As a result, the Special Purpose Financial Statements may not be suitable for any other purpose. Our report is intended solely for the Company and Wipro Limited and should not be distributed to or used by parties other than the Company and Wipro Limited.

Management's Responsibility for the Special Purpose Financial Statements

The Company's Board of Directors is responsible for the preparation of these special purpose financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the basis described in Note 2 (i) of the special purpose financial statements for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the special purpose financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the special purpose financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Special Purpose Financial Statements

Our objectives are to obtain reasonable assurance about whether the special purpose financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these special purpose financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the special purpose financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design
 audit procedures that are appropriate in the circumstances, but not for the purpose of
 expressing an opinion on whether the Company has in place an adequate internal
 financial controls system over financial reporting and the operating effectiveness of
 such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of
 accounting and, based on the audit evidence obtained, whether a material uncertainty
 exists related to events or conditions that may cast significant doubt on the Company's
 ability to continue as a going concern. If we conclude that a material uncertainty exists,
 we are required to draw attention in our auditor's report to the related disclosures in
 the special purpose financial statements or, if such disclosures are inadequate, to
 modify our opinion. Our conclusions are based on the audit evidence obtained up to
 the date of our auditor's report. However, future events or conditions may cause the
 Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the special purpose financial statements, including the disclosures, and whether the special purpose financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the special purpose financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the special purpose financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the special purpose financial statements.

WIPRO LLC

NOTES TO THE STANDALONE FINANCIAL STATEMENTS (\$\sigma\$ in millions, except share and per share data, unless otherwise stated)

1. The Company overview

Wipro LLC ("the Company") is a subsidiary of Wipro Limited ('the holding company'). The Company is incorporated in USA and is engaged in the software development services.

2. Basis of preparation of financial statements

(i) Statement of compliance and basis of preparation

This special purpose financial statement is prepared for inclusion in the annual report of the Ultimate Holding Company (Wipro limited) under the requirements of section 129(3) of the Companies Act, 2013.

These are the Standalone financial statements of Wipro LLC. The Company has not prepared consolidated financial statements because it has availed the specific exemption from the preparation of consolidated financial statements, available under Ind AS 110, "Consolidated Financial Statements". Accordingly, the investment in the subsidiaries are accounted for on a cost basis in these standalone financial statements.

The investment in subsidiaries is considered as a long term investment and carried at cost, less impairment, if any (refer note 6).

The financial performance and position of the Company and the subsidiaries are included in the consolidated financial statements of Wipro Limited, incorporated under the Companies Act, 2013, and having its registered office at Doddakanelli, Sarjapur Road, Bengaluru – 560035, Karnataka, India.

The financial statement is prepared in accordance with Indian Accounting Standards (Ind AS), the provisions of the Companies Act, 2013 ("the Companies Act"). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

Accounting policies have been applied consistently to all periods presented in these financial statements, except for new accounting standards adopted by the Company.

The financial statements correspond to the classification provisions contained in Ind AS 1, "Presentation of Financial Statements". For clarity, various items are aggregated in the statement of profit and loss and balance sheet. These items are disaggregated separately in the notes to the financial statements, where applicable.

All amounts included in the financial statements are reported in millions of USD (\$ in millions) except share and per share data, unless otherwise stated. Due to rounding off, the numbers presented throughout the document may not add up precisely to the totals and percentages may not precisely reflect the absolute figures. Previous year figures have been regrouped/re-arranged, wherever necessary.

Amounts below rounding off norm adopted by the Company been disclosed as nil in the financial statement.

Items included in the financial statement of the Company are measured using the currency of the primary economic environment in which these entities operate (i.e. the "functional currency"). The functional currency of the company is US Dollar and the financial statement is also presented in US Dollar.

(ii) Basis of measurement

These financial statements have been prepared on a historical cost convention and on an accrual basis, except for financial instruments classified as fair value through other comprehensive income or fair value through profit or loss.

(iii) Use of estimates and judgment

The preparation of the financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in the following notes:

- Revenue recognition: The Company applies judgement to determine whether each product or services promised to a customer are capable of being distinct, and are distinct in the context of the contract, if not, the promised product or services are combined and accounted as a single performance obligation. The Company allocates the arrangement consideration to separately identifiable performance obligation deliverables based on their relative stand-alone selling price. In cases where the Company is unable to determine the stand-alone selling price the company uses expected cost-plus margin approach in estimating the stand-alone selling price. The Company uses the percentage of completion method using the input (cost expended) method to measure progress towards completion in respect of fixed price contracts. Percentage of completion method accounting relies on estimates of total expected contract revenue and costs. This method is followed when reasonably dependable estimates of the revenues and costs applicable to various elements of the contract can be made. Key factors that are reviewed in estimating the future costs to complete include estimates of future labor costs and productivity efficiencies. Because the financial reporting of these contracts depends on estimates that are assessed continually during the term of these contracts, revenue recognised, profit and timing of revenue for remaining performance obligations are subject to revisions as the contract progresses to completion. When estimates indicate that a loss will be incurred, the loss is provided for in the period in which the loss becomes probable. Volume discounts are recorded as a reduction of revenue. When the amount of discount varies with the levels of revenue, volume discount is recorded based on estimate of future revenue from the customer.
- b) Impairment testing: Investments in subsidiaries, goodwill and intangible assets are tested for impairment at least annually and when events occur or changes in circumstances indicate that the recoverable amount of the asset or the cash generating unit to which these pertain is less than its carrying value. The recoverable amount of the asset or the cash generating units is higher of value in use and fair value less cost of disposal. The calculation of value in use of a cash generating unit involves use of significant estimates and assumptions which includes turnover, growth rates and net margins used to calculate projected future cash flows, risk-adjusted discount rate, future economic and market conditions.
- c) Income taxes: The major tax jurisdictions for the Company is United States of America. Significant judgments are involved in determining the provision for income taxes including judgment on whether tax positions are probable of being sustained in tax assessments. A tax assessment can involve complex issues, which can only be resolved over extended time periods.
- d) Deferred taxes: Deferred tax is recorded on temporary differences between the tax bases of assets and liabilities and their carrying amounts, at the rates that have been enacted or substantively enacted at the reporting date. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences and tax loss carry-forwards become deductible. The Company considers the expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. The amount of the deferred tax assets considered realisable,

however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced.

- e) Compensated absences: The cost of compensated absences are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. All assumptions are reviewed at each reporting date.
- f) Expected credit losses on financial assets: The impairment provisions of financial assets are based on assumptions about risk of default and expected timing of collection. The Company uses judgment in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's history of collections, customer's creditworthiness, existing market conditions as well as forward looking estimates at the end of each reporting period.
- Measurement of fair value of non-marketable equity investments: These instruments are initially recorded at cost and subsequently measured at fair value. Fair value of investments is determined using the market and income approaches. The market approach includes the use of financial metrics and ratios of comparable companies, such as revenue, earnings, comparable performance multiples, recent financial rounds and the level of marketability of the investments. The selection of comparable companies requires management judgment and is based on a number of factors, including comparable company sizes, growth rates and development stages. The income approach includes the use of discounted cash flow model, which requires significant estimates regarding the investees' revenue, costs, and discount rates based on the risk profile of comparable companies. Estimates of revenue and costs are developed using available historical and forecast data.
- h) Useful lives of property, plant and equipment: The Company depreciates property, plant and equipment on a straight-line basis over estimated useful lives of the assets. The charge in respect of periodic depreciation is derived based on an estimate of an asset's expected useful life and the expected residual value at the end of its life. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology. The estimated useful life is reviewed at least annually.
- Useful lives of intangible assets: The Company amortizes intangible assets on a straight-line basis over estimated useful lives of the assets. The useful life is estimated based on a number of factors including the effects of obsolescence, demand, competition and other economic factors such as the stability of the industry and known technological advances and the level of maintenance expenditures required to obtain the expected future cash flows from the assets. The estimated useful life is reviewed at least annually
- 3. Other estimates: The share-based compensation expense is determined based on the Company's estimate of equity instruments that will eventually vest.

4. Significant accounting policies

(i) Functional and presentation currency

These financial statements are presented in USD, which is the functional currency of the Company.

(ii) Foreign currency transactions and translation

Transactions in foreign currency are translated into the functional currency using the exchange rates prevailing at the date of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from translation at the exchange rates prevailing at the reporting date of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of profit and loss and reported within foreign exchange gains/(losses), net, within results of operating activities except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges. Gains/(losses), net, relating to translation or settlement of borrowings denominated in foreign currency are reported within finance expense. Non-monetary assets and liabilities denominated in foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction. Translation differences on non-monetary financial assets measured at fair value at the reporting date, such as equities classified as financial instruments measured at fair value through other comprehensive income are included in other comprehensive income, net of taxes.

(iii) Financial instruments

a) Non-derivative financial instruments:

Non-derivative financial instruments consist of:

- financial assets, which include cash and cash equivalents, trade receivables, unbilled receivables, finance lease receivables, employee and other advances, investments in equity and debt securities and eligible current and non-current assets; Financial assets are derecognised when substantial risks and rewards of ownership of the financial asset have been transferred. In cases where substantial risks and rewards of ownership of the financial assets are neither transferred nor retained, financial assets are derecognised only when the Company has not retained control over the financial asset.
- financial liabilities, which include long and short-term loans and borrowings, bank overdrafts, trade
 payables, eligible current and non-current liabilities.
- Non- derivative financial instruments are recognised initially at fair value.

Subsequent to initial recognition, non-derivative financial instruments are measured as described below:

A. Cash and cash equivalents

The Company's cash and cash equivalents consist of cash on hand and in banks and demand deposits with banks, which can be withdrawn at any time, without prior notice or penalty on the principal.

For the purposes of the cash flow statement, cash and cash equivalents include cash on hand, in banks and demand deposits with banks, net of outstanding bank overdrafts that are repayable on demand and are considered part of the Company's cash management system. In the balance sheet, bank overdrafts are presented under borrowings within current liabilities.

B. Investments

Financial instruments measured at amortised cost:

Debt instruments that meet the following criteria are measured at amortised cost (except for debt instruments that are designated at fair value through Profit or Loss (PVTPL) on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect confractual
 cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding.

Financial instruments measured at fair value through other comprehensive income (FVTOCI):

Debt instruments that meet the following criteria are measured at fair value through other comprehensive income (FVTOCI) (except for debt instruments that are designated at fair value through Profit or Loss (FVTPL) on initial recognition)

- the asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling the financial asset; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payment
 of principal and interest on the principal amount outstanding.

Interest income is recognised in statement of profit and loss for FVTOCI debt instruments. Other changes in fair value of FVTOCI financial assets are recognised in other comprehensive income. When the investment is disposed of, the cumulative gain or loss previously accumulated in reserves is transferred to statement of profit and loss.

Financial instruments measured at fair value through profit or loss (FVTPL):

Instruments that do not meet the amortised cost or FVTOCI criteria are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in statement of profit and loss. The gain or loss on disposal is recognised in statement of profit and loss.

Interest income is recognised in statement of profit and loss for FVTPL debt instruments. Dividend on financial assets at FVTPL is recognised when the Company's right to receive dividend is established.

Investments in equity instruments designated to be classified as FVTOCI:

The Company carries certain equity instruments which are not held for trading. The Company has elected the FVTOCI irrevocable option for these instruments. Movements in fair value of these investments are recognised in other comprehensive income and the gain or loss is not reclassified to statement of profit and loss on disposal of these investments. Dividends from these investments are recognised in statement of profit and loss when the Company's right to receive dividends is established.

Investments in subsidiaries:

Investment in subsidiaries are measured at cost less impairment.

C. Other financial assets:

Other financial assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. These are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any impairment losses. These comprise trade receivables, unbilled receivables and other assets.

D. Trade and other payables

Trade and other payables are initially recognised at fair value, and subsequently carried at amortised cost using the effective interest method. For these financial instruments, the carrying amounts approximate fair value due to the short-term maturity of these instruments.

b) Derecognition of financial instruments

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expires or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. If the Company retains substantially all the risks and rewards of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a borrowing for the proceeds received. A financial liability (or a part of a financial liability) is derecognised from the Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

(iv) Equity

a) Share capital and securities premium reserve

The authorized share capital of the Company is USD 902 and 503 USD as of March 31, 2019 and March 31, 2018 respectively and is divided into 180,378 common stock of \$ 2,500.

b) Retained earnings

Retained earnings comprises of the Company's undistributed earnings after taxes.

c) Other reserves

Changes in the fair value of financial instruments measured at fair value through other comprehensive income and actuarial gains and losses on defined benefit plans are recognized in other comprehensive income (net of taxes), and presented within equity in other reserves.

(v) Property, plant and equipment

a) Recognition and measurement

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. Cost includes expenditures directly attributable to the acquisition of the asset. General and specific borrowing costs directly attributable to the construction of a qualifying asset are capitalised as part of the cost.

b) Depreciation

The Company depreciates property, plant and equipment over the estimated useful life on a straight-line basis from the date the assets are available for use. Assets acquired under finance lease and leasehold improvements are amortised over the shorter of estimated useful life of the asset or the related lease term. Term licenses are amortised over their respective contract term. Freehold land is not depreciated. The estimated useful life of assets is reviewed and where appropriate are adjusted, annually. The estimated useful lives of assets are as follows:

rr chi ise

Category	<u>Useful life</u>
Buildings	28 to 40 years
Plant and machinery	5 to 21 years
Computer equipment and software	2 to 7 years
Furniture, fixtures and equipment	3 to 10 years
Vehicles	4 to 5 years

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Subsequent expenditure relating to property, plant and equipment is capitalised only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably.

Deposits and advances paid towards the acquisition of property, plant and equipment outstanding as at each reporting date and the cost of property, plant and equipment not available for use before such date are disclosed under capital work- in-progress.

(vi) Business combination, Goodwill and Intangible assets

a) Business combination

Business combinations are accounted for using the purchase (acquisition) method. The cost of an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the date of exchange by the Company. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at fair value at the date of acquisition. Transaction costs incurred in connection with a business acquisition are expensed as incurred.

The cost of an acquisition also includes the fair value of any contingent consideration measured as at the date of acquisition. Any subsequent changes to the fair value of contingent consideration classified as liabilities, other than measurement period adjustments, are recognised in the statement of profit and loss.

b) Goodwill

The excess of the cost of an acquisition over the Company's share in the fair value of the acquiree's identifiable assets and liabilities is recognised as goodwill. If the excess is negative, a bargain purchase gain is recognised in equity as capital reserve. Goodwill is measured at cost less accumulated impairment (if any).

Goodwill associated with the disposal of an operation that is part of cash-generating unit is measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit retained, unless the entity can demonstrate that some other method better reflects the goodwill associated with the operation disposed of.

c) Intangible assets

Intangible assets acquired separately are measured at cost of acquisition. Intangible assets acquired in a business combination are measured at fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortization and impairment losses, if any.

The amortization of an intangible asset with a finite useful life reflects the manner in which the economic benefit is expected to be generated.

The estimated useful life of amortisable intangibles is reviewed and where appropriate are adjusted, annually. The estimated useful lives of the amortisable intangible assets for the current and comparative periods are as follows:

Category	Useful life
Customer related intangibles	5 years
Marketing related intangibles	15 years

Goodwill and intangible assets, if any, associated with an operation disposed shall be measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit retained, unless the entity can demonstrate that some other method better reflects the goodwill associated with the operation disposed of.

(vii) Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date. The arrangement is, or contains a lease if, fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

a) Arrangements where the Company is the lessee

Leases of property, plant and equipment, where the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at lower of the fair value of the leased property and the present value of the minimum lease payments. Lease payments are apportioned between the finance charge and the outstanding liability. The finance charge is allocated to periods during the lease term at a constant periodic rate of interest on the remaining balance of the liability.

Leases where the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases are recognised in the statement of profit and loss on a straight-line basis over the lease term.

b) Arrangements where the Company is the lessor

In certain arrangements, the Company recognises revenue from the sale of products given under finance leases. The Company records gross finance receivables, unearned income and the estimated residual value of the leased equipment on consummation of such leases. Unearned income represents the excess of the gross finance lease receivable plus the estimated residual value over the sales price of the equipment. The Company recognises unearned income as finance income over the lease term using the effective interest method.

(viii) Inventories

Inventories are valued at lower of cost and net realisable value, including necessary provision for obsolescence. Cost is determined using the weighted average method.

(ix) Impairment

A) Financial assets

The Company applies the expected credit loss model for recognizing impairment loss on financial assets measured at amortised cost, debt instruments classified as FVTOCI, lease receivables, trade receivables, lease receivables, contract assets and other financial assets. Expected credit loss is the difference between the contractual cash flows and the cash flows that the entity expects to receive discounted using effective interest rate.

Loss allowances for trade receivables, contract assets and lease receivables are measured at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument. Lifetime expected credit loss is computed based on a provision matrix which takes in to the account risk profiling of oustomers and historical credit loss experience adjusted for forward looking information. For other financial assets, expected credit loss is measured at the amount equal to twelve months expected credit loss unless there has been a significant increase in credit risk from initial recognition, in which case those are measured at lifetime expected credit loss. Refer note 2 (iii) (f) for further information

B) Impairment of Investment in subsidiaries

The Company assesses investments in subsidiaries for impairment whenever events or changes in circumstances indicate that the carrying amount of the investment may not be recoverable. If any such indication exists, the Company estimates the recoverable amount of the investment in subsidiary. The recoverable amount of such investment is the higher of its fair value less cost of disposal (FVLCD) and its value-in-use (VIU). The VIU of the investment is calculated using projected future cash flows. If the recoverable amount of the investment is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the statement of profit and loss.

C) Non - financial assets

The Company assesses long-lived assets such as property, plant and equipment and acquired intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or group of assets may not be recoverable. If any such indication exists, the Company estimates the recoverable amount of the asset or group of assets. The recoverable amount of an asset or cash generating unit is the higher of its fair value less cost of disposal (FVLCD) and its value-in-use (VIU). The VIU of long-lived assets is calculated using projected future cash flows. FVLCD of a cash generating unit is computed using turnover and earnings multiples. If the recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the statement of profit and loss. If at the reporting date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the impairment losses previously recognised are reversed such that the asset is recognised at its recoverable amount but not exceeding written down value which would have been reported if the impairment losses had not been recognised initially.

Goodwill is tested for impairment at least annually at the same time and when events occur or changes in circumstances indicate that the recoverable amount of the cash generating unit is less than its carrying value. The goodwill impairment test is performed at the level of cash-generating unit or groups of cash-generating units which represent the lowest level at which goodwill is monitored for internal management purposes. An impairment in respect of goodwill is not reversed.

(x) Employee benefits

a) Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are recorded as expense as the related service is provided. A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

b) Compensated absences

The employees of the Company are entitled to compensated absences. The employees can carry forward a portion of the unutilised accumulating compensated absences and utilise it in future periods or receive cash at retirement or termination of employment. The Company records an obligation for compensated absences in the period in which the employee renders the services that increases this entitlement. The Company measures the expected cost of compensated absences as the additional amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. The Company recognises accumulated compensated absences based on actuarial valuation using the projected unit credit method. Non-accumulating compensated absences are recognised in the period in which the absences occur.

(xi) Share based payment transactions

Selected employees of the Company receive remuneration in the form of equity settled instruments of Wipro Limited, for rendering services over a defined vesting period. Equity instruments granted are measured by reference to the fair value of the instrument at the date of grant. In cases, where equity instruments are granted at a nominal exercise price, the intrinsic value on the date of grant approximates the fair value. The expense is recognized in the statement of profit and loss. The equity instruments generally vest in a graded manner over the vesting period. The fair value determined at the grant date is expensed over the vesting period of the respective tranches of such grants (accelerated amortization). The stock compensation expense is determined based on the Company's estimate of equity instruments that will eventually vest.

(xii) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset, if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions for onerous contracts are recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. Provisions for onerous contracts are measured at the present value of lower of the expected net cost of fulfilling the contract and the expected cost of terminating the contract.

(xiii) Revenue

The Company derives revenue primarily from software development, maintenance of software/hardware and related services, business process services, sale of IT and other products.

Revenue is recognised upon transfer of control of promised products or services to customers in an amount that reflects the consideration the Company expects to receive in exchange for those products or services. To recognize revenues, the Company applies the following five step approach: (1) identify the contract with a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenues when a performance obligation is satisfied.

At contract inception, the Company assesses its promise to transfer products or services to a customer to identify separate performance obligations. The Company applies judgement to determine whether each

product or service promised to a customer is capable of being distinct, and are distinct in the context of the contract, if not, the promised products or services are combined and accounted as a single performance obligation. The Company allocates the arrangement consideration to separately identifiable performance obligations based on their relative stand-alone selling price or residual method. Stand-alone selling prices are determined based on sale prices for the components when it is regularly sold separately, in cases where the Company is unable to determine the stand-alone selling price the Company uses third-party prices for similar deliverables or the company uses expected cost-plus margin approach in estimating the stand-alone selling price.

For performance obligations where control is transferred over time, revenues are recognised by measuring progress towards completion of the performance obligation. The selection of the method to measure progress towards completion requires judgment and is based on the nature of the promised products or services to be provided.

The method for recognizing revenues and costs depends on the nature of the services rendered:

A. Time and materials contracts

Revenues and costs relating to time and materials contracts are recognised as the related services are rendered.

B. Fixed-price contracts

i) Fixed-price development contracts.

Revenues from fixed-price contracts, including software development, and integration contracts, where the performance obligations are satisfied over time, are recognised using the "percentage-of-completion" method. Percentage of completion is determined based on project costs incurred to date as a percentage of total estimated project costs required to complete the project. The cost expended (or input) method has been used to measure progress towards completion as there is a direct relationship between input and productivity. If the Company is not able to reasonably measure the progress of completion, revenue is recognised only to the extent of costs incurred for which recoverability is probable. When total cost estimates exceed revenues in an arrangement, the estimated losses are recognised in the statement of profit and loss in the period in which such losses become probable based on the current contract estimates as an onerous contract provision.

A contract asset is a right to consideration that is conditional upon factors other than the passage of time. Contract assets primarily relate to unbilled amounts on fixed-price development contracts and are classified as non-financial asset as the contractual right to consideration is dependent on completion of contractual milestones.

A contract liability is an entity's obligation to transfer goods or services to a customer for which the entity has received consideration (or the amount is due) from the customer.

Unbilled revenues on other than fixed price development contracts are classified as a financial asset where the right to consideration is unconditional upon passage of time

ii) Maintenance contracts

Revenues related to fixed-price maintenance, testing and business process services are recognised based on our right to invoice for services performed for contracts in which the invoicing is representative of the value being delivered. If our invoicing is not consistent with value delivered, revenues are recognised as the service is performed using the percentage of completion method. When services are performed through an indefinite number of repetitive acts over a specified period, revenue is recognised on a

straight-line basis over the specified period unless some other method better represents the stage of completion.

In certain projects, a fixed quantum of service or output units is agreed at a fixed price for a fixed term. In such contracts, revenue is recognised with respect to the actual output achieved till date as a percentage of total contractual output. Any residual service unutilized by the customer is recognised as revenue on completion of the term.

iii) Volume based contracts

Revenues and costs are recognised as the related services are rendered.

C. Products

Revenue on product sales are recognised when the customer obtains control of the specified asset.

D. Others

Any change in scope or price is considered as a contract modification. The Company accounts for modifications to existing contracts by assessing whether the services added are distinct and whether the pricing is at the stand-alone selling price. Services added that are not distinct are accounted for on a cumulative catch up basis, while those that are distinct are accounted for prospectively, either as a separate contract if the additional services are priced at the stand-alone selling price, or as a termination of the existing contract and creation of a new contract if not priced at the stand-alone selling price.

The Company accounts for variable considerations like, volume discounts, rebates and pricing incentives to customers as reduction of revenue on a systematic and rational basis over the period of the contract. The Company estimates an amount of such variable consideration using expected value method or the single most likely amount in a range of possible consideration depending on which method better predicts the amount of consideration to which the Company may be entitled.

Revenues are shown net of allowances/ returns, sales tax, value added tax, goods and services tax and applicable discounts and allowances.

The Company accrues the estimated cost of warranties at the time when the revenue is recognised. The accruais are based on the Company's historical experience of material usage and service delivery costs.

Incremental costs that relate directly to a contract and incurred in securing a contract with a customer are recognised as an asset when the Company expects to recover these costs and amortised over the contract term.

The Company recognizes contract fulfilment cost as an asset if those costs specifically relate to a contract or to an anticipated contract, the costs generate or enhance resources that will be used in satisfying performance obligations in future; and the costs are expected to be recovered. The asset so recognised is amortised on a systematic basis consistent with the transfer of goods or services to customer to which the asset relates.

The Company assesses the timing of the transfer of goods or services to the customer as compared to the timing of payments to determine whether a significant financing component exists. As a practical expedient, the Company does not assess the existence of a significant financing component when the difference between payment and transfer of deliverables is a year or less. If the difference in timing arises for reasons other than the provision of finance to either the customer or us, no financing component is deemed to exist.

The Company may enter into arrangements with third party suppliers to resell products or services. In such cases, the Company evaluates whether the Company is the principal (i.e. report revenues on a gross basis) or agent (i.e. report revenues on a net basis). In doing so, the Company first evaluates whether the Company

controls the good or service before it is transferred to the customer. If Company controls the good or service before it is transferred to the customer, Company is the principal; if not, the Company is the agent.

(xiv) Finance cost

Finance cost comprise interest cost on borrowings, gain or losses arising on re-measurement of financial assets at FVTPL, gains/ (losses) on translation or settlement of foreign currency borrowings and changes in fair value and gains/ (losses) on settlement of related derivative instruments. Borrowing costs that are not directly attributable to a qualifying asset are recognised in the statement of profit and loss using the effective interest method.

(xv) Other income

Other income comprises interest income on deposits, dividend income and gains / (losses), net, on disposal of investments. Interest income is recognised using the effective interest method. Dividend income is recognised when the right to receive payment is established.

(xvi) Income tax

Income tax comprises current and deferred tax. Income tax expense is recognised in the statement of profit and loss except to the extent it relates to a business combination, or items directly recognised in equity or in other comprehensive income.

a) Current income tax

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for the period. The tax rates and tax laws used to compute the current tax amount are those that are enacted or substantively enacted as at the reporting date and applicable for the period. The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognised amounts and where it intends either to settle on a net basis, or to realise the asset and liability simultaneously.

b) Deferred income tax

Deferred income tax is recognised using the balance sheet approach. Deferred income tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in financial statements, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred income tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised.

Deferred income tax liabilities are recognised for all taxable temporary differences except in respect of taxable temporary differences that is expected to reverse within the tax holiday period, taxable temporary differences associated with investments in subsidiaries, associates and foreign branches where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The Company offsets deferred income tax assets and liabilities, where it has a legally enforceable right to offset current tax assets against current tax liabilities, and they relate to taxes levied by the same taxation authority on either the same taxable entity, or on different taxable entities where there is an intention to settle the current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

(xvii) Earnings per share

Basic and Diluted earnings per share is computed using the weighted average number of equity shares outstanding during the period.

(xviii) Cash flow statement

Cash flow are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash from operating, investing and financing activities of the Company are segregated.

The amendment to Ind AS 7, require entities to provide disclosures about changes in their liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses).

(xix) Assets held for sale

Sale of business is classified as held for sale, if their carrying amount is intended to be recovered principally through sale rather than through continuing use. The condition for classification as held for sale is met when disposal business is available for immediate sale and the same is highly probable of being completed within one year from the date of classification as held for sale.

(xx) Discontinued operations

A discontinued operation is a component of the Company's business that represents a separate line of business that has been disposed off or is held for sale, or is a subsidiary acquired exclusively with a view to resale. Classification as a discontinued operation occurs upon the earlier of disposal or when the operation meets the criteria to be classified as held for sale.

(xxi) Non-current assets and disposal groups held for sale

Assets of disposal groups that is available for immediate sale and where the sale is highly probable of being completed within one year from the date of classification are considered and classified as assets held for sale. Noncurrent assets and disposal groups held for sale are measured at the lower of carrying amount and fair value less costs to sell.

(xxii) Disposal of assets

The gain or loss arising on disposal or retirement of assets are recognised in the statement of profit and

New Accounting standards adopted by the Company:

Ind AS 115 - Revenue from Contract with Customers

On April 1, 2018, the Company adopted Ind AS 115, "Revenue from Contracts with Customers" using the cumulative catch-up transition method applied to contracts that were not completed as at April 1, 2018. In accordance with the cumulative catch-up transition method, the comparatives have not been retrospectively adjusted.

The adoption of the new standard has resulted in a reduction of USD 2 in opening retained earnings, primarily relating to certain contract costs because these do not meet the criteria for recognition as costs to fulfil a contract.

On account of adoption of Ind AS 115, unbilled revenues pertaining to fixed price development contracts of USD I4 as at March 31, 2019 has been considered as non-financial Contract assets, which are billable on completion milestones specified in the contracts.

Unbilled revenues of USD 41, which are billable based on passage of time been classified as unbilled receivables.

The adoption of Ind AS 115, did not have any material impact on the statement of profit and loss for the year ended March 31, 2019.

A. Contract Asset and Liabilities

The Company classifies its right to consideration in exchange for deliverables as either a receivable or a contract asset.

A receivable is a right to consideration that is unconditional. A right to consideration is unconditional if only the passage of time is required before payment of that consideration is due. For example, the company recognizes a receivable for revenues related to time and materials contracts or volume-based contracts. The Company presents such receivables as part of unbilled receivables at their net estimated realizable value. The same is tested for impairment as per the guidance in Ind AS 109 using expected credit loss method.

During the year ended March 31, 2019, the Company recognised revenue of USD 16 arising from opening unearned revenue as at April 1, 2018

During the year ended March 31, 2019, USD 17 of unbilled revenue pertaining to fixed-price development contracts (contract assets) which had an amount of USD 17 as at April 1, 2018, has been reclassified to trade receivables on completion of milestones.

Contract assets and liabilities are reported in a net position on a contract by contract basis at the end of each reporting period.

B. Remaining Performance Obligations

Revenue allocated to remaining performance obligations represents contracted revenue that has not yet been recognised which includes uncarned revenue and amounts that will be invoiced and recognised as revenue in future periods. Applying the practical expedient, the Company has not disclosed its right to consideration from customer in an amount that corresponds directly with the value to the customer of the Company's performance completed to date which are, contracts invoiced on time and material basis and volume based.

As at March 31, 2019, the aggregate amount of transaction price allocated to remaining performance obligations, other than those meeting the exclusion criteria above, was USD 1,786, of which approximately 34% is expected to be recognised as revenues within 2 years, and the remainder thereafter. This includes

contracts that can be terminated for convenience without a substantive penalty since, based on current assessment, the occurrence of the same is expected to be remote.

C. Disaggregation of Revenues

The table below presents disaggregated revenues from contracts with customers by contract-type. The Company believes that the below disaggregation best depicts the nature, amount, timing and uncertainty of revenue and cash flows from economic factors.

•	<u>Total</u>
Revenue	- 4-
Sales of services	818
Revenue by nature of contract	
Fixed price and volume based	485
Time and materials	333
Products	· · · · · · · · · · · · · · · · · · ·
	818

Appendix B to Ind AS 21 - Foreign Currency Transactions and Advance Consideration

The Company has applied Appendix B to Ind AS 21 - Foreign Currency Transactions and Advance Consideration prospectively effective April 1, 2018. The effect on adoption of this amendment on the financial statements is insignificant

New accounting standards not yet adopted:

Certain new standards, amendments to standards and interpretations are not yet effective for annual periods beginning after April 1 2018, and have not been applied in preparing these financial statements. New standards, amendments to standards and interpretations that could have potential impact on the financial statements of the Company are:

Ind AS 116

On March 30, 2019, the Ministry of Corporate Affairs issued Ind AS 116, Leases. Ind AS 116 will replace the existing leases Standard, Ind AS 17 Leases, and related interpretations. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases. IND AS 116 introduces a single lessee accounting model and requires a lessee to recognised assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. The Standard also contains enhanced disclosure requirements for lessees.

The standard allows for two methods of transition: the full retrospective approach, requires entities to retrospectively apply the new standard to each prior reporting period presented and the entities need to adjust equity at the beginning of the earliest comparative period presented, or the modified retrospective approach, under which the date of initial application of the new leases standard, lessees recognize the cumulative effect of initial application as an adjustment to the opening balance of equity as at annual periods beginning on or after January 1, 2019.

The Company will adopt this standard using modified retrospective method effective April 1, 2019, and accordingly, the comparative for year ended March 31, 2018 and 2019, will not be retrospectively adjusted. The Company has elected certain available practical expedients on transition.

Based on assessment, the adoption of the new standard is expected to recognize a right-of-use assets and corresponding lease liabilities of approximately USD 8 and 11 respectively. There will be reclassification in the cash flow categories in the statement of cash flows.

Appendix C to Ind AS 12 - Uncertainty over income tax treatments

On March 30, 2019, Ministry of Corporate Affairs issued Appendix C to Ind AS 12, which clarifies the accounting for uncertainties in income taxes. The interpretation is to be applied to the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under Ind AS 12. The entity has to consider the probability of the relevant taxation authority accepting the tax treatment and the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates would depend upon the probability. The effective date for adoption of Appendix C to Ind AS 12 is April 1, 2019. The Company will apply Appendix C to Ind AS 12 prospectively from the effective date and the effect on adoption of Ind AS 12 on the financial statement is insignificant.

Amendment to Ind AS 12 - Income Taxes

On March 30, 2019, Ministry of Corporate Affairs issued amendments to Ind AS 12 – Income Taxes. The amendments clarify that an entity shall recognise the income tax consequences of dividends on financial instruments classified as equity should be recognised according to where the entity originally recognised those past transactions or events that generated distributable profits were recognised. The effective date of these amendments is annual periods beginning on or after April 1, 2019. The Company is currently assessing the impact of this amendment on the Company's consolidated financial statements.

Amendment to Ind AS 19 - Plan Amendment, Curtailment or Settlement

On March 30, 2019, Ministry of Corporate Affairs issued amendments to Ind AS 19, 'Employee Benefits', in connection with accounting for plan amendments, curtailments and settlements requiring an entity to determine the current service costs and the net interest for the period after the remeasurement using the assumptions used for the remeasurement; and determine the net interest for the remaining period based on the remeasured net defined benefit liability or asset. These amendments are effective for annual reporting periods beginning on or after April 1, 2019. The Company will apply the amendment from the effective date and the effect on adoption of the amendment on the consolidated financial statement is insignificant

* Business combination

IBM Trirega and IBM Netcool network manager:

On July 1,2017 the Company entered into a contract with IBM and got non-exclusive rights to use the Intellectual Property of two of the IBM products which are IBM Trirega and IBM Netcool network Manager. We also rebadged employees who are working in development, chancement and support of these products. The contract is for a period of 15 years commencing from 1st July 2017. The acquisition allows us to enhance the product and self to other customers. The acquisition includes intengible assets, assembled workforce and a multi-year service agreement which qualify as business combination. The acquisition was consumpated for a consideration of USD 46 for IBM Trirega and USD 45 for IBM Nelcool network manager.

The following table presents the allocation of purchase prica:

•	355	700

[•] On account of adoption of Ind AS 115, unbilled receivables pertaining to fixed price development contracts of USD 14, as at March 31, 2019, has been considered as non-financial Contract assets, which are billable upon completion of milestones specified in the contracts.

Offsetting linancial assets and liabilities
The following table contains information on other financial assets and trade payables and other payables subject to offsetting:

· ·	A:	rat
	March 31, 2019	March 31, 2018
Financial Assets:		
Gross amounts of recognised other financial assets	.182	174
Gross amounts of recognised trade payables and other liabilities set off in the	(2)	-
Net amounts of recognised other financial assets presented in the balance	180	174
Financial liabilities		
Gross amounts of recognised trade payables and other payables	261	691
Gross amounts of recognised trade payables and other liabilities set off in the	(2)	
Net amounts of recognised trade payables and other payables presented in	259	691

For the financial assets and liabilities subject to offsetting or similar arrangements, each agreement between the Company and the counterparty allows for not settlement of the relevant financial assets and liabilities when both elect to settle on a net basis. In the absence of such an election, financial assets and liabilities will be settled on it gross basis and hence are not offset.

The fair value of each and each equivalents, trade receivables, unbilled revenues, borrowings, trade payables, other current financial assets and liabilities approximate their carrying amount largely due to the short-term nature of these instruments. The Company's long-term debt has been naturities approximate their carrying amount targety due to the solution of these institutions. The company contracted at market rates of interest. Accordingly, the carrying value of such long-term debt approximates, fair value. Further, finance lease receivables that are overdue are periodically evaluated based on individual credit worthiness of customers. Based on this evaluation, the Company records allowance for estimated losses on these receivables. As of March 31, 2019 and March 31, 2018, the carrying value of such receivables, net of allowances approximates the fair value.

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or fiability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table presents fair value hierarchy of assets measured at fair value on a recurring basis:

		As at Ma	rch 31, 2019		As a	t March 3	1, 2019	
Particulars	Total	Fair Value in	ensurements at using	reporting date	Total		ue measure rting date i	
		Level 1	Level 2	Level 3		Level 1	Level 2	Level 3
Assets								
Investments in equity instruments - Other than	89		-	89	55	-		55
Subsidiaries/Associates								

Eair value of level 3 investments is determined using market approach. For investments in early stage entities, the market approach involves the use of recent financial rounds and the level of marketability of the investments. These factors are assessed on a periodic basis and movements in fair value of these investments is recognized in other comprehensive income.

Description of significant unobservable inputs to valuation:

Sale of financial assets

From time to time, in the normal course of business, the Company transfers accounts receivables to banks. Under the terms of the arrangements, the Company surrenders control over the financial assets and transfer is without recourse. Accordingly, such transfers are recorded as sale of financial assets. Gains and losses on sale of financial assets without recourse are recorded at the time of sale based on the carrying value of the financial assets and fair value of servicing liability.

Financial risk management

Market Risk

Market risk is the risk of loss of future earnings, to fair values or to future east flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments; foreign currency receivables, payables and loans and borrowings.

Risk management procedure

The Company manages market risk through a corporate treasury department, which evaluates and exercises independent control over the entire process of market risk management. The corporate treasury department recommends risk management objectives and policies, which are approved by senior management. The activities of this department include management of each resources, borrowing strategies, and ensuring compliance with market risk limits and policies:

Foreign currency risk

The Company operates internationally and a major portion of its business is transacted in USD currency. Consequently, the Company is not exposed to foreign exchange risk.

Interest rate risk

Interest rate risk primarily arises from floating rate borrowing, including various revolving and other lines of credit. The Company's short-term investments and short-term borrowing do not expose it to significant interest rate risk. If interest rates were to increase by 100 bps from March 31, 2019, additional net annual interest expense on floating rate borrowing would amount to approximately USD 2.

Credit risk

Credit risk arises from the possibility that customers may not be able to settle their obligations as agreed. To manage this, the Company periodically assesses the financial reliability of customers, taking into account the financial conditions current economic trends, analysis of historical bad debts and ageing of accounts receivable. Individual risk limits are set accordingly. Two customers accounted for more than 10% of the accounts receivable amounting to USD 64 as at March 31, 2019 and not single customer has accounted for more than 10% of the accounts receivable as at March 31, 2018. One of the customer has accounted for more than 10% of the revenues amounting to USD 117 for the year ended March 31, 2019, no single customer has accounted for more than 10% of the revenues arounting to USD 117 for the year ended March 31, 2019, no single customer has accounted for more than 10% of the revenues for the year ended March 31, 2018. There is no significant concentration of credit risk.

Counterparty Risk

Counterparty risk encompasses issuer risk on marketable securities, settlement risk on derivative and money market contracts and credit risk on eash and time deposits. Exposure to these risks are closely monitored and maintained within predetermined parameters.

Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or incet its obligations on time or at a reasonable price. The Company's corporate treasury department is responsible for liquidity and funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Company's not liquidity position through rolling-forecasts on the basis of expected cash flows. As of March 31, 2019, cash and cash equivalents are held with major banks and financial institutions.

The table below provides details regarding the remaining contractual maturities of significant financial liabilities at the reporting date. The

amounts include estimated interest payments and exclude the impact of netting agreements, if an

19. Incomes taxes

"Wipro LLC is included in the consolidated tax return of Wipro Limited. The Company calculates the provision for income taxes by using a "separate return" method. Under this method, the Company computes tax provision as if it will file a separate return with the tax authority, thereby reporting its taxable income or loss and paying the applicable tax to or receiving the appropriate refund from Wipro Limited.

Currently the Company does not have any difference between the tax provision (or benefit) allocated under the separate return method and payments to be made to (or received from) Wipro Limited for tax expense.

Income tax expense has been allocated as follows:

-	•	As at		
		 March 31, 2019	March 31, 2018

25. Earnings per share

A reconciliation of loss for the year and equity shares used in the computation of basic and diluted earnings per equity share is set out below:

Basic: Basic earnings per share is calculated by dividing the profit attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the year.

Diluted. Diluted earnings per share is calculated by adjusting the weighted average number of equity shares outstanding during the year for assumed conversion of all dilutive potential equity shares.

•	Year	Year ended	
	March 31, 2019	March 31, 2018	
The computation of basic and diluted earnings per share is set out below:			
Loss for the year	(352)	(46)	
Weighted average number of equity shares outstanding	180,378	180,378	
Basic and diluted loss per share (face value: USD 2,500 each)	(1,952.67)	(254.27)	

26. Additional capital disclosure

The key objective of the Company's capital management is to ensure that it maintains a stable capital structure with the focus on total equity to uphold investor, creditor, and customer confidence and to ensure future development of its business. The Company focused on keeping strong total equity base to ensure independence, security, as well as a high illumeral fluxibility for potential fluture borrowings, if required without impacting the risk profile of the Company.

The capital structure as on March 31, 2019 and 2018 was as follows:

	As at		% Change	
Total equity	March 31, 2019 284	March 31, 2018 225	2018-19 26%	
Current loans and borrowings	144	469		
Non current loans and borrowings	9.6	01		
Total loans and borrowings	240	479	-50%	
As percentage of total capital	46%	68%		
Total capital (loans and borrowings and equity)	524	704	-25%	

27. Assets taken on lease

Operating Leases

The Company is obligated under non-cancellable operating leases for office premises that are renewable on a periodic basis at the option of both lessor and lessee. The total rental expense under non cancellable operating leases amounted to USD 4 for the year ended March 31, 2019 (2018: USD 3)

Details of contractual payments under non-cancellable leases are given below:

	. As	Asat	
	March 31, 2019	March 31, 2018	
Not later than one year	4	3	
Later than one year but not later than five years	, .8	8

Included in the balancesheet as follows:		
- Current maturities of obligations under finance lease	. 9	. 9
- Long term maturities of finance lease obligations	2	9

28. Other operating income

During the year ended March 31, 2019, the Company has concluded the divestment of one of its subsidiary

The calculation of the gain on sale is shown below:

Particulars	Total
Cash considerations	352
Less: Carrying amount of net assets disposed	.258
Gain on sale	94

In accordance with the sale agreement, total cash consideration is USD 382 and the Company paid USD 55 to subscribe for units issued by the buyer. Units amounting to USD 30 are callable by the buyer if certain business targets committed by the Company are not met over a period of three years. The fair value of these callable units is estimated to be insignificant as at reporting date. Consequently, the sale consideration accounted of USD 326 and units amounting to USD 25 issued by the buyer.

29. Contingent Liabilities

There are no contingent liabilities as at March 31, 2019 (March 31, 2018:Nil).

30. Capital Commitment

The estimated amount of contracts remaining to be executed on capital account and not provided for (net of advance) is USD 1 (March 31, 2018; USD 9)
^ Value is less than USD 1

31. Segment reporting

The Company operates in one business segment, namely sale of software services. In line with IND-AS 108, as the relevant information is available from balance sheet and the statement of profit and loss itself, and keeping in view the objective of segment reporting, the Company is not required to disclose segment information as per IND AS -108.

31.1 Information about major customer

One of the customer amounting to USD 117 accounts for more than 10% of total revenue of the company.

31.2 Geographical information

The Company is domiciled in USA. The information about Company's non-current assets (excluding deferred tax assets and non-current tax assets) and Revenue by location are detailed below:
